**Abstract**—*Pagria pseudograta* sp. n. from Sri Lanka is described. *Pagria flavopustulata* and all its synonyms (*Nodostoma kanaraense* Jac., *P. flavopustulata* ab. *bicolor* Wse., *P. signata grandis* Chûjô, *P. signata* var. *innodata* Pic, and *P. nodieri* Pic) are placed to synonyms of *P. grata* Baly. Also, *Nodostoma fulvipes* Baly with the replacement name *N. xanthopus* Har., *P. vignaphila* Bry., and *P. aeneicollis* Lef. are synonymized with this species. *Pagria bipunctata* Lef. is placed to synonymy with *P. signata* (Motsch.). *Nodostoma concolor* Motsch. is transferred to the genus *Pagria*. *Pagria laevifrons* Jac., *P. aenescens* Jac. and *P. recticollis* Pic are transferred to the genus *Cleoporus* Lef. *Pagria pallidicolor* Pic is transferred to the genus *Basilepta* Baly. The drawings of the aedeagi of *P. pseudograta* sp. n. and *P. ceylonica* Pic are given. The distribution of a number of species is clarified.
