Abstract—A key to species of the genus *Dioctria* Meigen is given. A new tribe, Molobratini trib., n. is erected; it is characterized by the presence of spurs on the fore tibia. *Molobratia arkadii* sp. n. (the Ukraine), *M. bokhai* sp. n. (Primorskii Territory), and *Myelaphus ussuriensis* sp. n. (Amur Province, Primorskii Territory) are described.
