Study of Galaxies in the Lynx–Cancer Void. IV. Photometric Properties <i>Yu. A. Perepelitsyna, S. A. Pustilnik, and A. Yu. Kniazev</i>	247
Study of the Relation between the Jet and Accretion-Disk Emission in Blazars Using RATAN-600 Multifrequency Data <i>T. V. Mufakharov, Yu. V. Sotnikova, A. K. Erkenov, and M. G. Mingaliev</i>	266
Circumstellar Envelope Manifestations in the Optical Spectra of Evolved Stars <i>V. G. Klochkova</i>	279
Speckle Interferometry of Magnetic Stars with the BTA. II. Results of 2010–2012 Observations <i>D. A. Rastegaev, Yu. Yu. Balega, V. V. Dyachenko, A. F. Maksimov, and E. V. Malogolovets</i>	296
Magnetic Field Structure and Evolution Features of Selected Stars. I. <i>Yu. V. Glagolevskij</i>	305
Photometric and Magnetic Variability of the Ap Star GY And <i>N. V. Metlova, V. D. Bychkov, L. V. Bychkova, and J. Madej</i>	315
A Study of the Magnetic Field in FK Com <i>V. B. Puzin, I. S. Savanov, I. I. Romanyuk, E. A. Semenko, and E. S. Dmitrienko</i>	321
Modified Physical and Geometric Parameters of the Eclipsing X-Ray Binary System Centaurus X-3 <i>M. A. Al-Wardat, H. Al-Naimiy, A. Taani, A. Khasawneh, O. Al-Banawi, and H. S. Widyana</i>	325
Comparison of Low-Harmonics Spectra and Maps According to the WMAP and Planck Space Missions <i>O. V. Verkhodanov</i>	330
Main Stellar Spectrograph of the 6-Meter Telescope. Analysis, Reconstruction, and Operation <i>V. E. Panchuk, G. A. Chuntanov, and I. D. Naidenov</i>	339
Computation of the Horizontal Size of the RATAN-600 Beam Pattern for the “Southern Sector with a Flat Reflector” Mode with Allowance for the Parameters of Primary Feeds <i>S. Kh. Tokhchukova, A. N. Korzhavin, V. M. Bogod, E. A. Kurochkin, and A. V. Shendrik</i>	356
Astrokit—an Efficient Program for High-Precision Differential CCD Photometry and Search for Variable Stars <i>A. Y. Burdanov, V. V. Krushinsky, and A. A. Popov</i>	368
