Dark Matter: Dynamical Problems

V. V. Orlov and A. A. Raikov 377

Angular Size—Redshift: Experiment and Calculation

V. R. Amirkhanyan 383

New H α Flux Measurements in Nearby Dwarf Galaxies

S. S. Kaisin and I. D. Karachentsev 390

Chemical Abundances in the Globular Clusters NGC 6229 and NGC 6779

D. A. Khamidullina, M. E. Sharina, V. V. Shimansky, and E. Davoust 409

Results of Magnetic Field Measurements of CP Stars Carried Out with the Russian 6-m Telescope. I. Observations in 2007

I. I. Romanyuk, E. A. Semenko, and D. O. Kudryavtsev 427

Spectral Variability of the IR Source IRAS 01005+7910 Optical Component

V. G. Klochkova, E. L. Chentsov, V. E. Panchuk, E. G. Sendzikas, and M. V. Yushkin 439

Physical and Geometric Parameters of the Evolved Binary System HD 6009

M. A. Al-Wardat 454

An Analytic Algorithm to Calculate the Inclination, Ascending Node, and Semimajor Axis of Spectroscopic Binary Orbits Using a Single Speckle Measurement and the Parallax

J. A. Docobo, P. P. Campo, M. Andrade, and E. P. Horch 461

Statistics of the Planck CMB Signal in Direction of Gamma-Ray Bursts from the BATSE and BeppoSAX Catalogs

M. L. Khabibullina, O. V. Verkhodanov, and V. V. Sokolov 472

Two-Dimensional Spectral Estimators of Statistical Anisotropy and Search for the Isolated Directions in Planck Mission Data

Ya. V. Naiden and O. V. Verkhodanov 488

Upgrade of the Fiber-Fed Spectrograph of the Kourovka Astronomical Observatory

V. V. Krushinsky, A. A. Popov, and A. F. Punanova 497
