Coronagraphic Methods for Detecting Faint Astronomical Objects Near Bright Ones: Application to the 2.5-m Telescope of Sternberg Astronomical Institute <i>A. M. Cherepashchuk, O. I. Bugaenko, I. S. Kim, and V. V. Popov</i>	169
Giant Pulses of the Crab Nebula Pulsar as an Indicator of a Strong Electromagnetic Wave <i>M. V. Popov, A. G. Rudnitskii, and V. A. Soglasnov</i>	178
The Dynamics and Structure of Plasma Inhomogeneities in the Crab Nebula <i>B. Ya. Losovskii</i>	187
Determining Basic Characteristics of Stars from Evolutionary Computations <i>S. G. Sichevskij</i>	193
A Dynamical Study of the Multiple System 17 Cygni ABFG <i>L. G. Romanenko</i>	206
Long-Term Variations in the Spottedness of BY Dra M Dwarfs <i>I. Yu. Alekseev and A. V. Kozhevnikova</i>	221
Corotating Structures in the Solar Wind from 111-MHz Observations of Interplanetary Scintillations at Large Elongations <i>A. V. Glyantsev, S. A. Tyul'bashev, I. V. Chashei, V. I. Shishov, and L. B. Potapova</i>	233
Discontinuous Plasma Flows Near Reconnecting Current Layers in Solar Flares <i>S. I. Bezrodnykh, N. P. Kolesnikov, and B. V. Somov</i>	239
