The Luminosity Function of Narrow-Line Seyfert 1 Galaxies Based on SDSS Data (DR7) <i>A. A. Ermash</i>	317
A Possible Mechanism for the Formation of Tilted Disks in Intermediate Polars <i>D. V. Bisikalo, A. G. Zhilkin, P. V. Kaygorodov, V. A. Ustyugov, and M. M. Montgomery</i>	327
Flux-Density Variability of the Blazar S5 1803+784 (J1800+7828) on a Timescale of a Month <i>A. G. Gorshkov, V. K. Konnikova, M. G. Mingaliev, and A. K. Erkenov</i>	338
Flux Density Variability of Radio Sources at Declinations $10^{\circ}$ – $12^{\circ}30'$ (J2000) on Time Scales Less than a Month <i>A. G. Gorshkov, V. K. Konnikova, and M. G. Mingaliev</i>	344
Chemical Composition of Planetary Nebulae in the Large and Small Magellanic Clouds <i>V. V. Holovatyy, B. Ya. Melekh, M. M. Sokil, and N. V. Havrylova</i>	366
Turbulent Entrainment at the Boundaries of the Convective Cores of Main-sequence Stars <i>E. I. Staritsin</i>	380
Rotational–Oscillatory Variations in the Earth Rotation Parameters within Short Time Intervals <i>L. D. Akulenko, Yu. G. Markov, V. V. Perepelkin, L. V. Rykhlova, and A. S. Filippova</i>	391
