Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Astronomy Reports* ISSN 1063-7729.

A Multicomponent Model for Computing the Thermal Structure of Collapsing Protostellar Clouds <i>Ya. N. Pavlyuchenkov and A. G. Zhilkin</i>	641
Wolf–Rayet Stars with Relativistic Companions <i>A. V. Tutukov, A. V. Fedorova, and A. M. Cherepashchuk</i>	657
<i>K</i> Corrections to Radial-Velocity Curves of Optical Components in X-Ray Binaries. Massive Systems with Weak X-Ray Heating <i>V. S. Petrov, E. A. Antokhina, and A. M. Cherepashchuk</i>	669
Solution of the Transfer Equation in a Moving Medium <i>A. G. Barseghyan and V. V. Ter-Avetisyan</i>	686
Photoelectric Lunar-Occultation Observations of Several Close Binary Stars <i>E. M. Trunkovsky</i>	692
The Character of Solar-type Activity and the Depth of the Convective Zone <i>M. M. Katsova, M. A. Livshits, and T. V. Mishenina</i>	702
