Vol. 60, No. 9, 2016

Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Astronomy Reports* ISSN 1063-7729.

Characteristics of GPS Sources in the Planck Survey <i>A. E. Volvach, N. S. Kardashev, M. G. Larionov, and L. N. Volvach</i>	781
Distribution of Inhomogeneities in the Interstellar Plasma in the Directions of Three Distant Pulsars from Observations with the RadioAstron Ground–Space Interferometer <i>M. V. Popov, A. S. Andrianov, N. Bartel, C. Gwinn, B. C. Joshi, D. Jauncey, N. S. Kardashev, A. G. Rudnitskii, T. V. Smirnova, V. A. Soglasnov, E. N. Fadeev, and V. I. Shishov</i>	792
Orbital–period Variations of the Algol-type Eclipsing Binaries RW CrB and AO Ser <i>A. I. Khaliullina</i>	807
Estimation of a Star’s Radius from Its Effective Temperature and Surface Gravity Taking into Account Stellar Evolution <i>S. G. Sichevskij</i>	816
The Area and Absolute Magnetic Flux of Sunspots Over the Past 400 Years <i>Yu. A. Nagovitsyn, A. G. Tlatov, and E. Yu. Nagovitsyna</i>	831
Structure of the Magnetic Field at Altitudes of 1–1.15 Solar Radii <i>Z. S. Akhtemov, N. N. Stepanyan, V. G. Fainshtein, and G. V. Rudenko</i>	839
The Total Number of Spicules on the Solar Surface and Their Role in Heating and Mass Balance in the Solar Corona <i>S. G. Mamedov, D. M. Kuli-Zade, Z. F. Alieva, M. M. Musaev, and F. R. Mustafa</i>	848
Retardation of Angular Velocity of a Rotating Star Due To Mass Loss <i>Lin-Sen Li</i>	853
Multiwavelength Astronomy and Big Data <i>A. M. Mickaelian</i>	857
