PHENOPTOSIS

Review

New Data on Programmed Aging – Slow Phenoptosis

M. V. Skulachev and V. P. Skulachev

977 1205

Hypothesis

Receptor Regulation of Senile Phenoptosis

M. V. Skulachev, F. F. Severin, and V. P. Skulachev

994 1225

Reviews

The Programmed Aging Paradigm: How We Get Old

Giacinto Libertini

1004 1237

Microbiota and Mitobiota. Putting an Equal Sign between Mitochondria and Bacteria

*D. B. Zorov, E. Y. Plotnikov, D. N. Silachev, L. D. Zorova, I. B. Pevzner, S. D. Zorov,
V. A. Babenko, S. S. Jankauskas, V. A. Popkov, and P. S. Savina*

1017 1252

Phenoptosis in Arthropods and Immortality of Social Insects

V. M. Kartsev

1032 1269

Modern Evolutionary Mechanics Theories and Resolving the Programmed/Non-programmed
Aging Controversy

Theodore C. Goldsmith

1049 1290

Decrease in ATP Biosynthesis and Dysfunction of Biological Membranes.
Two Possible Key Mechanisms of Phenoptosis

A. V. Rzheshhevsky

1056 1300

Pineal Gland as an Endocrine Gravitational Lunasensor: Manifestation of Moon-Phase
Dependent Morphological Changes in Mice

A. V. Gerasimov, V. P. Kostyuchenko, A. S. Solovieva, and A. M. Olovnikov

1069 1316

Review

The Problem of Determination of Cause of Laboratory Animal's Death:
A Critical Review of Definitions of "Fatal" and "Incidental" Lesions*V. N. Manskikh*

1075 1324

Prevention of Peroxidation of Cardiolipin Liposomes by Quinol-Based Antioxidants

*A. V. Lokhmatikov, N. E. Voskoboynikova, D. A. Cherepanov, N. V. Sumbatyan,
G. A. Korshunova, M. V. Skulachev, H.-J. Steinhoff, V. P. Skulachev, and A. Y. Mulkidjanian*

1081 1332

Preventive and Therapeutic Effects of SkQ1-Containing Visomitin Eye Drops
against Light-Induced Retinal Degeneration*Yu. P. Novikova, O. S. Gancharova, O. V. Eichler, P. P. Philippov, and E. N. Grigoryan*

1101 1355

Mitochondria-Targeted Antioxidant SkQ1 Accelerates Maturation in Campbell Dwarf Hamsters
(*Phodopus campbelli*)*K. A. Rogovin, A. M. Khrushcheva, O. N. Shekarova,
M. V. Ushakova, V. N. Manskikh, and N. Yu. Vasilieva*

1111 1367

Effects of Mitochondria-Targeted Plastoquinone Derivative Antioxidant (SkQ1)
on Demography of Free-Breeding Campbell Dwarf Hamsters (*Phodopus campbelli*)
Kept in Outdoor Conditions. Reproduction and Lifespan:
Explanation in the Framework of Ultimate Loads*K. A. Rogovin, A. M. Khrushcheva, O. N. Shekarova, M. V. Ushakova,
V. N. Manskikh, O. V. Sokolova, and N. Yu. Vasilieva*

1117 1374

Therapeutic Doses of SkQ1 Do Not Induce Cytochromes P450 in Rat Liver

K. N. Myasoedova and D. N. Silachev

1130 1389

Review

Aging Is a Simple Deprivation Syndrome Driven by a Quasi-programmed Preventable
and Reversible Drift of Control System Set Points Due to Inappropriate
Organism–Environment Interaction*A. V. Khalyavkin and V. N. Krutko*

1133 1392

Effect of the Mitochondria-Targeted Antioxidant SkQ1 on Development of Spontaneous
Tumors in BALB/c Mice*V. N. Manskikh, M. S. Krasilshchikova, V. A. Vygodin, and M. V. Egorov*
