MOLECULAR BIOLOGY OF MITOCHONDRIA (Special Issue)

Guest Editor – P. A. Kamenski

Detection of Mutations in Mitochondrial DNA by Droplet Digital PCR

J. K. Sofronova, Y. Y. Ilinsky, K. E. Orishchenko, E. G. Chupakhin, E. A. Lunev, and I. O. Mazunin 1031 1293

Reviews

Localization of Nuclear-Encoded mRNAs to Mitochondria Outer Surface

A. Golani-Armon and Y. Arava 1038 1299

DNA Import into Mitochondria

*Yu. M. Konstantinov, A. Dietrich, F. Weber-Lotfi, N. Ibrahim, E. S. Klimenko,
V. I. Tarasenko, T. A. Bolotova, and M. V. Koulintchenko* 1044 1307

The Mitochondrial Genome. The Nucleoid

A. A. Kolesnikov 1057 1322

Iron-Sulfur Clusters in Mitochondrial Metabolism: Multifaceted Roles of a Simple Cofactor

Johnny Stiban, Minyoung So, and Laurie S. Kaguni 1066 1332

Procedure for Purification of Recombinant preMsk1p from *E. coli* Determines Its Properties as a Factor of tRNA Import into Yeast Mitochondria

E. V. Smirnova, I. V. Chicherin, M. V. Baleva, N. S. Entelis, I. A. Tarasov, and P. A. Kamenski 1081 1349

Sustained Early Disruption of Mitochondrial Function Contributes to Arsenic-Induced Prostate Tumorigenesis

B. Singh, M. Kulawiec, K. M. Owens, A. Singh, and K. K. Singh 1089 1359

Pentatricopeptide Motifs in the N-Terminal Extension Domain of Yeast Mitochondrial RNA Polymerase Rpo41p Are Not Essential for Its Function

J. Kruszewski and P. Golik 1101 1371

Interaction between *Saccharomyces cerevisiae* Mitochondrial DNA-Binding Protein Abf2p and Cce1p Resolvase

E. O. Samoilova, I. A. Krashennnikov, and S. A. Levitskii 1111 1383

REGULAR ARTICLES

Reviews

Plant Factories for the Production of Monoclonal Antibodies

E. V. Sheshukova, T. V. Komarova, and Y. L. Dorokhov 1118 1392

Thermodynamic Analysis of Fast Stages of Specific Lesion Recognition by DNA Repair Enzymes

N. A. Kuznetsov and O. S. Fedorova

1136 1410

Protein Transphosphorylation During the Mutual Interaction between Phytochrome A and a Nuclear Isoform of Nucleoside Diphosphate Kinase Is Regulated by Red Light

A. Hetmann, M. Wujak, and S. Kowalczyk

1153 1427

New Fluorescent Macrolide Derivatives for Studying Interactions of Antibiotics and Their Analogs with the Ribosomal Exit Tunnel

A. G. Tereshchenkov, A. V. Shishkina, V. V. Karpenko, V. A. Chertkov,
A. L. Konevega, P. S. Kasatsky, A. A. Bogdanov, and N. V. Sumbatyan

1163 1439

Molecular Cloning, Biochemical Characterization, and Antitumor Properties of a Novel L-Asparaginase from *Synechococcus elongatus* PCC6803

R. Kebeish, A. El-Sayed, H. Fahmy, and A. Abdel-Ghany

1173 1451

Participation of Two Carbonic Anhydrases of the Alpha Family in Photosynthetic Reactions in *Arabidopsis thaliana*

E. M. Zhurikova, L. K. Ignatova, N. N. Rudenko, V. A. Mudrik, D. V. Vetoshkina, and B. N. Ivanov

1182 1463

Mitochondria-Targeted Antioxidant SkQR1 Reduces TNF-Induced Endothelial Permeability *in vitro*

I. I. Galkin, O. Yu. Pletjushkina, R. A. Zinovkin, V. V. Zakharova, B. V. Chernyak, and E. N. Popova

1188 –

Accelerated Publication

Free Initiation Factors eIF4A and eIF4B Are Dispensable for Translation Initiation on Uncapped mRNAs

P. A. Sakharov and S. Ch. Agalarov

1198 –

Perfect Hemihedral Twinning in Crystals of the γ -Subunit of Translation Initiation Factor 2 from *Sulfolobus solfataricus*: Cause and EffectO. V. Kravchenko, O. S. Nikonov, N. A. Nevskaya, E. A. Stolboushkina,
V. I. Arkhipova, M. B. Garber, and S. V. Nikonov

1205 –

Inhibition of Chaperonin GroEL by a Monomer of Ovine Prion Protein and Its Oligomeric Forms

S. S. Kudryavtseva, Y. Y. Stroylova, I. A. Zanyatkin, T. Haertle, and V. I. Muronetz

1213 –

Knockdown of Minichromosome Maintenance Proteins Inhibits Foci Forming of Mediator of DNA-Damage Checkpoint 1 in Response to DNA Damage in Human Esophageal Squamous Cell Carcinoma TE-1 Cells

Jinzhong Yu, Ruijie Wang, Jinfeng Wu, Zhongqin Dang, Qinsheng Zhang, and Bo Li

1221 –

Hypothesis

Do Mitochondria Have an Immune System?

V. A. Popkov, L. D. Zorova, I. O. Korvigo, D. N. Silachev, S. S. Jankauskas, V. A. Babenko,
I. B. Pevzner, T. I. Danilina, S. D. Zorov, E. Y. Plotnikov, and D. B. Zorov
