Reviews

Structural Characteristics and Catalytic Mechanism of <i>Bacillus</i> β -Propeller Phytases <i>N. P. Balaban, A. D. Suleimanova, L. R. Valeeva, E. V. Shakirov, and M. R. Sharipova</i>	785	1011
Neurotoxic Non-proteinogenic Amino Acid β - <i>N</i> -Methylamino-L-alanine and Its Role in Biological Systems <i>A. A. Popova and O. A. Koksharova</i>	794	1021
α -Tocopheryl Succinate Affects Malignant Cell Viability, Proliferation, and Differentiation <i>M. A. Savitskaya and G. E. Onischenko</i>	806	1034
Plant Sterols: Diversity, Biosynthesis, and Physiological Functions <i>J. N. Valitova, A. G. Sulkarnayeva, and F. V. Minibayeva</i>	819	1050
Functional Role of Carbohydrate Residues in Human Immunoglobulin G and Therapeutic Monoclonal Antibodies <i>Y. L. Dorokhov, E. V. Sheshukova, E. N. Kosobokova, A. V. Shindyapina, V. S. Kosorukov, and T. V. Komarova</i>	835	1069
Photosystem II Activity of Wild Type <i>Synechocystis</i> PCC 6803 and Its Mutants with Different Plastoquinone Pool Redox States <i>O. V. Voloshina, Y. V. Bolychevtseva, F. I. Kuzminov, M. Y. Gorbunov, I. V. Elanskaya, and V. V. Fadeev</i>	858	1091
Binding of Synthetic LKEKK Peptide to Human T-Lymphocytes <i>E. V. Navolotskaya, D. V. Zinchenko, Y. A. Zolotarev, A. A. Kolobov, and V. M. Lipkin</i>	871	1106
Effects of Ouabain on Proliferation of Human Endothelial Cells Correlate with Na^+ , K^+ -ATPase Activity and Intracellular Ratio of Na^+ and K^+ <i>A. M. Tverskoi, S. V. Sidorenko, E. A. Klimanova, O. A. Akimova, L. V. Smolyaninova, O. D. Lopina, and S. N. Orlov</i>	876	1112

Features of Gene Expression of *Bacillus pumilus* Metalloendopeptidase

N. L. Rudakova, A. R. Sabirova, N. P. Balaban, A. O. Tikhonova, and M. R. Sharipova

884 1122

Glutamic Acid – Amino Acid, Neurotransmitter, and Drug – Is Responsible for Protein Synthesis Rhythm in Hepatocyte Populations *in vitro* and *in vivo*

V. Y. Brodsky, L. A. Malchenko, D. S. Konchenko, N. D. Zvezdina, and T. K. Dubovaya

892 1130

NMDA-Receptors Are Involved in Cu²⁺/Paraquat-Induced Death of Cultured Cerebellar Granule NeuronsE. V. Stelmashook, E. E. Genrikhs, O. P. Aleksandrova,
G. A. Amelkina, E. A. Zelenova, and N. K. Isaev

899 1137

CommentaryTemporal Scaling of Age-Dependent Mortality: Dynamics of Aging in *Caenorhabditis elegans* Is Easy to Speed Up or Slow Down, but Its Overall Trajectory Is Stable
(Commentary to the paper by Stroustrup et al. (2016) *Nature*, **530**, 103-107)

A. V. Markov, E. B. Naimark, and E. U. Yakovleva

906 1145
