**Special Issue  
Dedicated to the Anniversary  
of Andrei D. Vinogradov**

**Engl./Russ.**

A Window to the Potassium World. The Evidence of Potassium Energetics in the Mitochondria and Identity of the Mitochondrial ATP-Dependent K<sup>+</sup> Channel (Mini-Review)

*Dmitry B. Zorov*

683 1007

Effect of Tau Protein on Mitochondrial Functions (Review)

*Khoren K. Epremyan, Tatyana N. Goleva, and Renata A. Zvyagilskaya*

689 1014

Discovery and Study of Transmembrane Rotary Ion-Translocating Nano-Motors: F-ATPase/Synthase of Mitochondria/Bacteria and V-ATPase of Eukaryotic Cells (Review)

*Vladimir Marshansky*

702 1030

Preparations of Terminal Oxidase Cytochrome *bd*-II Isolated from *Escherichia coli* Reveal Significant Hydrogen Peroxide Scavenging Activity

*Elena Forte, Martina R. Nastasi, and Vitaliy B. Borisov*

720 1051

Mechanism of Ion Translocation by Na<sup>+</sup>-Rhodopsin (Review)

*Alexander V. Bogachev, Alexander A. Baykov, Yulia V. Bertsova, and Mahir D. Mamedov*

731 1064

Interaction of Venturicidin and F<sub>o</sub>·F<sub>1</sub>-ATPase/ATP Synthase of Tightly Coupled Subbacterial Particles of *Paracoccus denitrificans* in Energized Membranes

*Tatyana V. Zharova, Vladimir S. Kozlovsky, and Vera G. Grivennikova*

742 1077

Structural Insight into Evolution of the Quinone Binding Site in Complex II (Review)

*Elena Maklashina*

752 1088

Proteomic Markers and Early Prediction of Alzheimer's Disease (Review)

*Natalia V. Zakharova, Anna E. Bugrova, Maria I. Indeykina, Yana B. Fedorova,  
Igor V. Kolykhalov, Svetlana I. Gavrilova, Evgeny N. Nikolaev, and Alexey S. Kononikhin*

762 1100

CRISPR–Cas9: A History of Its Discovery and Ethical Considerations  
of Its Use in Genome Editing (Review)

*Irina Gostimskaya*

777 1118

Sodium Ions as Regulators of Transcription in Mammalian Cells (Review)

*Olga D. Lopina, Dmitrii A. Fedorov, Svetlana V. Sidorenko, Olesya V. Bukach,  
and Elizaveta A. Klimanova*

789 1132

Role of Small Heat Shock Proteins in the Remodeling of Actin Microfilaments (Review)

*Lydia K. Muranova, Vladislav M. Shatov, and Nikolai B. Gusev*

800 1145

REGULAR PAPERS

Antibiotic Pyrrolomycin as an Efficient Mitochondrial Uncoupler

*Alexander M. Firsov, Ljudmila S. Khailova, Tatyana I. Rokitskaya, Elena A. Kotova,  
and Yuri N. Antonenko*

812 865

Inhibitory Effects of 7-Methylguanine and Its Metabolite 8-Hydroxy-7-Methylguanine  
on Human Poly(ADP-Ribose) Polymerase 1

*Tatyana A. Kurgina, Stanislav I. Shram, Mikhail M. Kutuzov, Tatyana V. Abramova,  
Tatyana A. Shcherbakova, Ekaterina A. Maltseva, Vladimir V. Poroikov, Olga I. Lavrik,  
Vytas K. Švedas, and Dmitry K. Nilov*

823 794

Regulation of SMAD Signaling Pathway by miRNAs Associated with Myocardial Fibrosis:  
*In silico* Analysis of Target Gene Networks

*Maria Pisklova, German Osmak, and Olga Favorova*

832 843

Effect of Peroxiredoxin 6 on p53 Transcription Factor Level

*Mars G. Sharapov, Ruslan G. Goncharov, Svetlana B. Parfenyuk, and Olga V. Glushkova*

839 962
