Vol. 51, No. 4, 2006

Simultaneous English language translation of the journal is available from Pleiades Publishing, Inc..
Distributed worldwide by Springer. *Biophysics* ISSN 0006-3509.

Molecular Biophysics

Evolutionary Differences between Alternative and Constitutive Protein-Coding Regions of Alternatively Spliced Genes of <i>Drosophila</i> <i>E. O. Ermakova, D. B. Mal'ko, and M. S. Gelfand</i>	515
EDAS—A Database of Alternatively Spliced Human Genes <i>R. N. Nurtdinov, A. D. Neverov, D. B. Mal'ko, I. A. Komosdem'yanskii, E. O. Ermakova, V. E. Ramenskii, A. A. Mironov, and M. S. Gelfand</i>	523
Ways to Improve the Prediction Quality in the Adaptive Algorithm of Automated Annotation (A^4) <i>A. M. Leontovich and K. Yu. Tokmachev</i>	527
Interstitial Telomeric Repeats as Markers of Evolutionary Changes in the Mammalian Karyotype: Human Chromosome 2 <i>N. V. Vorob'eva, L. S. Biltueva, Yu. L. Orlov, A. S. Grafodatskii, and N. A. Kolchanov</i>	535
Statistical Analysis of DNA Sequences Containing Nucleosome Positioning Sites <i>Yu. L. Orlov, V. G. Levitskii, O. G. Smirnova, O. A. Podkolodnaya, T. M. Khlebodarova, and N. A. Kolchanov</i>	541
Potential Open Reading Frames in 5'-Untranslated Regions of Eukaryotic mRNA <i>O. A. Volkova, A. V. Kochetov, S. E. Titov, and N. A. Kolchanov</i>	547
Optimal Ratio between the Average Conformational Entropy and the Average Energy of Interaction between Residues for Fast Protein Folding <i>O. V. Galzitskaya and S. A. Garbuzinskii</i>	554
Recognition of Transcription Factor Binding Sites by the SiteGA Method <i>V. G. Levitskii, E. V. Ignat'eva, E. A. Anan'ko, T. I. Merkulova, N. A. Kolchanov, and C. Hodgman</i>	565
Phylogenetic Analysis of the p53 Family <i>S. S. Pintus, E. S. Fomin, V. A. Ivanisenko, and N. A. Kolchanov</i>	571
Relationship of Micro- and Minisatellites in the Human Genome <i>V. A. Boeva, M. V. Fridman, and V. Yu. Makeev</i>	581
InterPro as a New Tool for Complete Genome Analysis: An Example of Comparative Analysis <i>N. J. Mulder, W. Fleischmann, A. Kanapin, and R. Apweiler</i>	587
Heteroassociation of Antibiotic Norfloxacin with Aromatic Vitamins in Aqueous Solution <i>M. P. Evstigneev, K. A. Rybakova, and D. B. Davies</i>	592
Carnosine Conformers <i>S. A. Klyuev</i>	599
Molecular Dynamics Simulation of the Substitution of Serine for the Conserved Glycine in the G-Loop in the <i>cdc28-srm</i> Yeast Mutant Using the Crystal Lattice of Human CDK2 Kinase <i>Kh. T. Kholmurodov, D. A. Kretov, A. S. Gerasimova, and N. A. Koltovaya</i>	603

Cell Biophysics

The Biophysical Aspects of Reconstructing a Single Cell by the Methods of Cell Engineering <i>V. A. Nikitin and E. E. Fesenko</i>	615
Protein Associated with Mitochondrial DNA Protect It against X-Rays and Hydrogen Peroxide <i>N. A. Gouliaeva, E. A. Kuznetsova, and A. I. Gaziev</i>	620
Energy Distribution and Ion Selectivity of the Bacterial Potassium Channel <i>A. V. Dmitriev, I. V. Markov, V. G. Baryshnikov, and V. A. Tverdislov</i>	624
Proton Transfer Along the External Proton Channel of Bacteriorhodopsin <i>R. V. Belousov and A. K. Kukushkin</i>	629
Spectral Features and Structure of Chloroplasts under an Early Block of Chlorophyll Synthesis <i>V. G. Ladygin</i>	635
Dependence of Dielectrophoretic Force on the Size of Linear Erythrocyte Aggregates in Suspension <i>A. Zehe, A. Ramírez, and O. Starostenko</i>	645

Complex Systems Biophysics

Modeling of Intraorgan Arterial Vasculature. I. Steady Flow at Low Reynolds Numbers <i>N. N. Kizilova</i>	654
Modeling of Heat Transfer in Whole-Body Hyperthermia <i>D. N. Kinsht</i>	659
Biological Structures as Photonic Objects <i>A. V. Il'inskii, F. Silva-Andrade, E. B. Shadrin, V. O. Samoilov, and A. L. Orbeli</i>	664
Fluid Transport in Isolated Rabbit Eye Lens <i>L. V. Stepanova, G. M. Sychev, and I. Yu. Marchenko</i>	668

Discussions

A Simple First-Principles Model of Reduplication <i>L. A. Gribov</i>	671
---	-----

Chronicle

Second Moscow Conference on Computational Molecular Biology MCCMB'05 <i>M. S. Gelfand</i>	675
--	-----

Synopses of Deposited Papers

Efficient Physical Immobilization and an Enzyme Molecule <i>S. V. Sinitsyn</i>	677
Mechanism of Activation of Biological Objects by Magnetic Field <i>N. P. Gorlenko</i>	678
