Vol. 40, No. 2, 2016

Distributed worldwide by Springer. *Moscow University Computational Mathematics and Cybernetics* ISSN 0278-6419.

A Finite Rational Algorithm that Verifies the Diagonalizability of a Square Matrix by Congruence <i>Kh. D. Ikramov</i>	53
On Stationarity Conditions in an Optimal Control Problem with a Simple Contact with the Phase Boundary <i>A. V. Dmitruk and I. A. Samylovskii</i>	57
Confidence Prediction of the Mean Values of Multiple Observations <i>A. G. Belov</i>	65
Combining Endogenous and Exogenous Variables in a Special Case of Non-Parametric Time Series Forecasting Model <i>A. P. Motrenko, K. V. Rudakov, and V. V. Strijov</i>	71
On the Outcome of False Images of Linear k -Valued Functions for Composite Numbers k when the Number of Variables Increases <i>A. A. Voronenko</i>	79
On the Existence of Provably Secure Cloud Computing Systems <i>N. P. Varnovsky, V. A. Zakharov, and A. V. Shokurov</i>	83
Contribution from the Accuracy of Phoneme Recognition to the Quality of Automatic Recognition of Russian Speech <i>I. A. Karpukhin</i>	89
