|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| On the Zeros of Cross-Product Bessel Functions<br>in Oblique Derivative Boundary-Value Problems<br><i>S. S. Budzinskiy</i>                    | 53 |
| Stochastic Geometry for Population-Dynamic Modeling:<br>A Dieckmann Model with Immovable Individuals<br><i>E. G. Galkin and A. A. Nikitin</i> | 61 |
| On the Toeplitz and Polar Decompositions of an Involution Matrix<br><i>Kh. D. Ikramov</i>                                                     | 69 |
| Multidimensional Economic-Growth Models with an Integral Utility Function<br><i>Yu. N. Kiselev, M. V. Orlov, and S. M. Orlov</i>              | 73 |
| Completeness Criterion in Class of Exponential-Polynomial Functions<br><i>S. S. Marchenkov</i>                                                | 87 |
| Refining Rossberg's Theorem<br><i>V. I. Pagurova</i>                                                                                          | 95 |
| Difference Differential Operators with Values at the Midpoints of the Sides<br>of Cells of a Triangular Grid<br><i>M. N. Sablin</i>           | 97 |
