Distributed worldwide by Springer. *Moscow University Computational Mathematics and Cybernetics* ISSN 0278-6419.

A Comparative Analysis of Adaptive Algorithms in the Finite Element Method for Solving the Boundary Value Problem for a Stationary Reaction–Diffusion Equation <i>N. D. Zolotareva and E. S. Nikolaev</i>	97
Bankruptcy Prevention in Multiperiod Markowitz Optimization Problem <i>Alexey Soloviev and Hongwei Gao</i>	110
Almost Everywhere Convergence of a Wavelet thresholding Risk Estimate in a Model with Correlated Noise <i>O. V. Shestakov</i>	114
On Queue Length in a Queueing System <i>V. G. Ushakov and N. G. Ushakov</i>	118
Order of the Length of Boolean Functions in the Class of Exclusive-OR Sums of Pseudoproducts <i>S. N. Selezneva</i>	123
On Maximal Subgroups of the Group of Recursive Permutations <i>E. A. Kolmakov and S. S. Marchenkov</i>	128
Specific Properties of Canonical Separated Grammars <i>S. Yu. Soloviev</i>	133
Static Binary Analysis of Mobile Applications for the Android Platform, According to the Requirements of Information Security <i>Ya. A. Aleksandrov, L. K. Safin, K. N. Troshina, and A. V. Chernov</i>	141
