Properties of Grid Boundary Value Problems for Functions Defined on Grid Cells and Faces <i>N. V. Ardelyan, K. V. Kosmachevskii, and M. N. Sablin</i>	105
The Cauchy Problem for Singularly Perturbed Weakly Nonlinear Second-Order Differential Equations: An Iterative Method <i>E. E. Bukzhalev</i>	113
Nontrivial Stationary Points of Two-Species Self-Structured Communities <i>A. A. Nikitin and A. S. Savost'yanov</i>	122
A Limiting Multidimensional Distribution of Intermediate Order Statistics <i>V. I. Pagurova</i>	130
The Asymptotically Best Method for Synthesizing Limited-Depth Boolean Recursive Schemes <i>V. V. Zhukov</i>	134
Universal Functions for Classes of Boolean Polynomials <i>A. A. Voronenko</i>	142
Computation Scheduling in Multiprocessor Systems with Several Types of Additional Resources and Arbitrary Processors <i>M. G. Furugyan</i>	145
