Calculating the Isotropic Subspace of a Symmetric Quasi-Definite Matrix <i>Kh. D. Ikramov</i>	97
A Numerical Way of Determining the Boundaries of a System of Bodies in a Three-Dimensional Medium by Means of Integral Equations <i>S. G. Golovina and E. V. Zakharov</i>	100
Equilibrium Integral Equations with Kurtosian Kernels in Spaces of Various Dimensions <i>A. A. Nikitin and M. V. Nikolaev</i>	105
Modeling a Simultaneous Confidence Band of the Mean Value of Multiple Responses with a Rectangular Domain for Predictors <i>A.G. Belov</i>	114
Discipline-Priority Queuing Systems without Serving Interruptions <i>A. K. Bergovin and V. G. Ushakov</i>	119
Specific Features of Finite Mixtures of Normal Distributions <i>M. B. Goncharenko and T. V. Zakharova</i>	126
Evolution of Replicator Systems: A Mathematical Model <i>S. V. Drozhzhin and A. S. Bratus'</i>	133
On the Complexity and Depth of Embedded in Boolean Cube Circuits That Implement Boolean Functions <i>S. A. Lozhkin, E. L. Dovgalyuk, and O. A. Sadovnikov</i>	138
