Distributed worldwide by Springer. *Moscow University Computational Mathematics and Cybernetics* ISSN 0278-6419.

Factorization of a Symbol Corresponding to the Sum of a Finite Number of Singular Integral Operators with Non-Carleman Shifts	
<i>D. A. Pivovarova</i>	145
A Solution to Fuller's Problem Using Constructions of Pontryagin's Maximum Principle	
<i>Yu. N. Kiselev, M. V. Orlov, and S. M. Orlov</i>	152
A Procedure for Constructing Optimum Functional Filters for Linear Stationary Stochastic Systems	
<i>M. A. Kamenshchikov and I. V. Kapalin</i>	163
Calculating the Number of Functions with a Given Endomorphism	
<i>S. S. Marchenkov and A. V. Chernyshev</i>	171
Properties of Open Procedure of Sequential Veto-Voting	
<i>N. M. Novikova and I. I. Pospelova</i>	177
Selecting the Superpositioning of Models for Railway Freight Forecasting	
<i>N. D. Uvarov, M. P. Kuznetsov, A. S. Malkova, K. V. Rudakov, and V. V. Strijov</i>	186
