Mkhitar Mkrtich Džrbashian

Preface

The present issue is devoted to the memory of a prominent Armenian mathematician, an Academician of National Academy of Sciences of Armenia, Mkhitar Mkrtich Džrbashian who essentially contributed to the contemporary development of complex analysis. M. M. Džrbashian was the founder-director of Institute of Mathematics of Armenian Academy of Sciences, which is the center of the scientific mathematics in Armenia. He founded also the present journal which he headed as the Editor in Chief up to 1994 when he passed away. The creative activity of M. M. Džrbashian involves many fields of Complex Analysis, and his results mainly are summarized in his three well-known monographs. Here, in this issue, his pupils give a large survey on the development in a field of complex analysis which he first created and an article on some other range of problems.
