Vol. 55, No. 3, 2019

Ordinary Differential Equations

Centers and Isochronous Centers of Liénard Systems
V. V. Amel'kin and A. E. Rudenok 283

Information Meaning of Entropy of Nonergodic Measures
V. I. Bakhtin 294

Strong Embeddability of Time-Invariant Nonlinear Differential Systems in Linear Differential Systems
V. T. Borukhov 303

Complete Description of Lyapunov and Perron Irregularity Coefficients of Linear Differential Systems Continuously Depending on a Parameter
A. S. Voidelevich 313

Dulac–Cherkas Test for Determining the Exact Number of Limit Cycles of Autonomous Systems on the Cylinder
A. A. Grin' and S. V. Rudevich 319

Solutions of the Fourth-Order Equation in the Generalized Hierarchy of the Second Painlevé Equation
V. I. Gromak 328

Extremum Condition and Stability Tests for Solutions of Gradient Systems
L. B. Knyazhishche 340

Partial Differential Equations

Cauchy Problem and the Second Mixed Problem for Parabolic Equations with a Dirac Potential Concentrated at Finitely Many Given Points
S. N. Baranovskaya and N. I. Yurchuk 348

Classical Solution of a Problem with Integral Conditions of the Second Kind for the One-Dimensional Wave Equation
V. I. Korzyuk, I. S. Kozlovskaya, and S. N. Naumavets 353

Control Theory

State Estimation for Linear Time-Varying Observation Systems
A. I. Astrovskii and I. V. Gaishun 363

Necessary Conditions for Optimality in Problems of Optimal Control of Systems with Discontinuous Right-Hand Side
O. I. Kostyukova and E. A. Kostina 374

Construction of Observers for a Delay Differential System with One-Dimensional Output
A. V. Metel'skii 390

Synthesis of Observers for Linear Systems of Neutral Type
V. E. Khartovskii 404

Numerical Methods

Multipoint Boundary Value Problem for the Lyapunov Equation in the Case of Weak Degeneration of the Boundary Conditions

A. N. Bondarev and V. N. Laptinskii 418

Monotone Finite-Difference Schemes of Second-Order Accuracy for Quasilinear Parabolic Equations with Mixed Derivatives

P. P. Matus, L. M. Hieu, and D. Pylak 424
