Vol. 58, No. 4, 2022

Ordinary Differential Equations

Stability Analysis of Solutions of Continuous–Discrete Stochastic Systems with Aftereffect by a Regularization Method
R. I. Kadiev and A. V. Ponosov 433

Fixed Points of a Mapping Generated by a System of Ordinary Differential Equations with Relay Hysteresis
A. M. Kamachkin, D. K. Potapov, and V. V. Yevstafyeva 455

On the Instability of Millionshchikov Linear Differential Systems with Continuous Dependence on a Real Parameter
A. V. Lipnitskii 468

Partial Differential Equations

Generalized Solutions of Stationary Boundary Value Problems for Biwave Equations
L. A. Alexeyeva 475

Asymptotics of Fundamental Solutions of Parabolic Equations with One Space Variable
A. N. Konenkov 488

Blow-Up of States in the Dynamics Given by the Schrödinger Equation with a Power-Law Nonlinearity in the Potential
V. Zh. Sakbaev and A. D. Shiryaeva 497

On the Solution of Boundary Value Problems for the Poisson Equation in Domains with Strongly (Weakly) Permeable Films in the Form of a Segment
S. E. Kholodovskii 509

Control Theory

On A-Orbital Linearization of Three-Dimensional Single-Input Affine Systems
D. A. Fetisov 519

Sufficient Conditions for the Existence of Stabilizing Controllers for Switched Interval Systems
A. S. Fursov and Yu. M. Mosolova 535

Numerical Methods

Numerical Solution of a Weakly Singular Integral Equation by the Method of Orthogonal Polynomials in Various Function Classes
G. A. Rasol'ko and V. M. Volkov 546

On an Approximate Solution of a Class of Systems
of Curvilinear Integral Equations
E. H. Khalilov 556

Short Communications

Application of Semigroup Theory to the Study
of Volterra Integro-Differential Equations
V. V. Vlasov and N. A. Rautian 571
