### Ordinary Differential Equations

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| Strong Isochronicity of the Lienard System<br><i>V. V. Amel'kin</i>                                                                   | 615 |
| On the Relationship between the Integrated Cosine Function<br>and the Operator Bessel Function<br><i>A. V. Glushak</i>                | 619 |
| On the Higher Characteristic Exponent of a Linear Differential System<br>Linearly Depending on a Parameter<br><i>A. V. Lipnitskii</i> | 627 |

---

### Partial Differential Equations

|                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Cauchy Problem for the Diffusion-Wave Equation<br>with the Caputo Partial Derivative<br><i>A. A. Voroshilov and A. A. Kilbas</i>                | 638 |
| On the Properties of the Dispersion Equations of Moment Systems<br>for the Fokker–Planck Equation<br><i>P. A. Zakharchenko and E. V. Radkevich</i>  | 650 |
| Integration of Telegraph Equations<br><i>Yu. S. Kolesov and A. S. Kirillov</i>                                                                      | 661 |
| A Generalization of Lions' Theory to First-Order Evolution<br>Differential Equations with Smooth Operator Coefficients: I<br><i>F. E. Lomovtsev</i> | 672 |
| On the Location of the Spectrum of a Mixed Boundary Value Problem<br>for the Laplace Equation in a Half-Disk<br><i>A. A. Polosin</i>                | 684 |
| On Boundary Value Problems for a Class of Singularly Perturbed<br>Equations of Arbitrary Odd Order<br><i>Ya. Sh. Salimov and I. M. Sabzalieva</i>   | 698 |

---

### Integral and Integro-Differential Equations

|                                                                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Equations with an Unstable Spectral Value of the Kernel<br>of an Integral Operator and Contrast Structures<br><i>A. A. Bobodzhonov and V. F. Safonov</i>                                                        | 705 |
| Estimates for Twisted Convolution Operators with Singularities of Kernels<br>on a Sphere and at the Origin<br><i>A. N. Karapetyants and V. A. Nogin</i>                                                         | 720 |
| Some Properties of Solutions of the Transport Equation<br><i>D. S. Kononova</i>                                                                                                                                 | 732 |
| Method of Differential Inequalities for Step-Like Contrast Structures<br>in Singularly Perturbed Integro-Differential Equations in the Spatially Two-Dimensional Case<br><i>N. N. Nefedov and A. G. Nikitin</i> | 739 |

---

## Short Communications

|                                                                                                                                        |     |
