Vol. 58, No. 6, 2022

Ordinary Differential Equations

Packing Dimensions of Basins Generated by Invariant Measures on a Sequence Space
V. I. Bakhtin and B. M. Sadok 717

Singularly Perturbed Cauchy Problem in Which the Limit Operator Has Multiple Spectrum and a Weak First-Order Turning Point
A. G. Eliseev and P. V. Kirichenko 727

On a Boundary Value Problem for a System of Differential–Difference Equations of Retarded Type
A. L. Skubachevskii and A. Sh. Adkhamova 741

Partial Differential Equations

Iteration Method for Solving the Problem of Determining the Coefficient and the Source in the Heat Equation
A. M. Denisov 750

Front Motion in a Problem with Weak Advection in the Case of a Continuous Source and a Modular-Type Source
N. N. Nefedov, E. I. Nikulin, and A. O. Orlov 757

Estimates for the Locally Periodic Homogenization of the Riemann–Hilbert Problem for a Generalized Beltrami Equation
M. M. Sirazhudinov and S. P. Dzhamaludinova 771

Control Theory

On the Iterative Regularization of the Lagrange Principle in Convex Optimal Control Problems for Distributed Systems of the Volterra Type with Operator Constraints
V. I. Sumin and M. I. Sumin 791

Numerical Methods

Numerical Integration of a Cauchy Problem Whose Solution Has Integer-Order Poles on the Real Axis
A. A. Belov and N. N. Kalitkin 810

Barycentric Method for Boundary Value Problems of Mathematical Physics
A. S. Ilyinskii and I. S. Polyanskii 834

Short Communications

Proof of the Jacobian Conjecture in the Two-Dimensional Case and Global Isochronous Centers of Polynomial Hamiltonian Differential Systems
V. V. Amel'kin 847

Errata

Erratum to: Controllability for Problems with Mixed Constraints
A. V. Arutyunov and S. E. Zhukovskiy 852
