Ordinary Differential Equations

Some Properties of the Angles between Lineals of Solutions of Exponentially
Dichotomous Systems

E. B. Bekryaeva 839

Stability of Solutions of Stochastic Functional-Differential Equations
with Locally Lipschitz Coefficients in Hilbert Spaces

M. M. Vas'kovskii and I. V. Kachan 845

Stability of Differential-Algebraic Equations under Uncertainty

A. A. Shcheglova and A. D. Kononov 860

Numerical Methods

Locally One-Dimensional Difference Scheme for the Third Boundary Value Problem
for a Parabolic Equation of the General Form with a Nonlocal Source

Z. V. Beshtokova and M. Kh. Shkhanukov-Lafishev 870

Generalized Collocation Method for Integro-Differential Equations
in an Exceptional Case

N. S. Gabbasov 881

Development and Application of an Exponential Method for Integrating
Stiff Systems Based on the Classical Runge–Kutta Method

M. P. Galanin and S. A. Konev 889

Numerical Solution of Inverse Problems for a Hyperbolic Equation
with a Small Parameter Multiplying the Highest Derivative

A. M. Denisov and S. I. Solov'eva 900

Parametrization of the Solution of the Kepler Problem and New Adaptive
Numerical Methods Based on This Parametrization

G. G. Elenin and T. G. Elenina 911

Construction and Structure Properties of Solutions of a Periodic Boundary
Value Problem for a Generalization of the Matrix Lyapunov
and Riccati Equations

V. N. Laptinskii and O. A. Makovetskaya 919

Coefficient Stability of the Solution of a Difference Scheme Approximating
a Mixed Problem for a Semilinear Parabolic Equation

P. P. Matus and S. V. Lemeshevsky 929

Quasi-One-Dimensional Flow of a Fluid with Anisotropic Viscosity
in a Pulsating Vessel

A. S. Mozokhina and S. I. Mukhin 938

Adaptive Interpolation Algorithm Based on a kd-Tree for Numerical Integration
of Systems of Ordinary Differential Equations with Interval Initial Conditions

A. Yu. Morozov and D. L. Reviznikov 945

Convergence of a Projection-Difference Method for the Approximate Solution of a Parabolic Equation with a Weighted Integral Condition on the Solution	957
<i>A. A. Petrova</i>	
Finite Element Models of Hyperelastic Materials Based on a New Strain Measure	971
<i>V. Yu. Salamatova, Yu. V. Vassilevski, and L. Wang</i>	
Unconditionally Stable Algorithm for Solving the Three-Dimensional Nonstationary Navier–Stokes Equations	979
<i>O. A. Shatrov, O. V. Shcheritsa, and O. S. Mazhorova</i>
