Numerical Methods

Efficient Numerical Integration Methods for the Cauchy Problem for Stiff Systems of Ordinary Differential Equations
A. A. Belov and N. N. Kalitkin 871

Boundary Value Problems for a Pseudoparabolic Equation with the Caputo Fractional Derivative
M. Kh. Beshtokov 884

Numerical Model of Compression Plasma Flows in Channels under a Longitudinal Magnetic Field
K. V. Brushlinskii and E. V. Stepin 894

Three-Level Schemes for the Advection Equation
P. N. Vabishchevich 905

Development and Application of Numerical Methods for Equations of Mixed Type in an Unbounded Domain
M. P. Galanin and D. L. Sorokin 915

Stability Analysis of Solution Methods for a Phase Transition Problem
A. O. Gusev, O. V. Shcheritsa, and O. S. Mazhorova 929

Iterative Method for Solving an Inverse Problem for a Hyperbolic Equation with a Small Parameter Multiplying the Highest Derivative
A. M. Denisov 940

Adaptive Numerical Methods for Solving the Problem about Scattering on a Force Center
G. G. Elenin and T. G. Elenina 949

Boundary Value Problems of Shielding Magnetic Fields by Cylindrical Multilayered Film Screens with Nonlinear Properties of the Layers
V. T. Erofeenko, G. F. Gromyko, and G. M. Zayats 963

Two-Layer Completely Conservative Difference Schemes for the Gasdynamic Equations in Eulerian Coordinates with Adaptive Solution Regularization
Yu. A. Poveshchenko, V. A. Gasilov, V. O. Podryga, O. R. Rahimly, and Yu. S. Sharova 976

Finite Element Method for 3D Deformation of Hyperelastic Materials
V. Yu. Salamatova 990
