|                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Intrapopulation Variability of the Qualitative and Quantitative Photoperiodic Responses in <i>Habrobracon hebetor</i> (Say) (Hymenoptera, Braconidae)                        |     |
| <i>S. Ya. Reznik, K. G. Samartsev, and M. Yu. Dolgovskaya</i>                                                                                                                | 277 |
| Trophic Specialization of the Poplar Leafminer <i>Phyllonorycter populifoliella</i> (Treitschke, 1833) (Lepidoptera, Gracillariidae)                                         |     |
| <i>I. V. Ermolaev, E. A. Rubleva, S. L. Rysin, A. A. Kozhenkova, and M. V. Ermolaeva</i>                                                                                     | 287 |
| Occurrence of Leaf Miners <i>Phyllonorycter populifoliella</i> (Treitschke) and <i>Ph. pastorella</i> (Zeller) (Lepidoptera, Gracillariidae) on Different Species of Poplars |     |
| <i>A. V. Selikhovkin, A. A. Egorov, D. D. Sitnikova, and N. A. Mamaev</i>                                                                                                    | 301 |
| The First Description of the Larva in the Genus <i>Sinodapterna</i> Dellacasa, 1986 (Coleoptera, Scarabaeidae, Aphodiini)                                                    |     |
| <i>S. A. Shabalin</i>                                                                                                                                                        | 307 |
| Larval Morphology of Root Weevils of the Tribe Cleonini (Coleoptera, Curculionidae)                                                                                          |     |
| <i>O. N. Nikulina</i>                                                                                                                                                        | 311 |
| Bees of the Tribe Anthidiini (Hymenoptera, Megachilidae) of Nakhchivan Autonomous Republic of Azerbaijan                                                                     |     |
| <i>A. V. Fateryga, M. Yu. Proshchalykin, and M. M. Maharramov</i>                                                                                                            | 323 |
| Contribution to the Blackfly Fauna (Diptera: Simuliidae) of North Ossetia–Alania                                                                                             |     |
| <i>S. V. Aibulatov, I. A. Budaeva, and A. A. Przhiboro</i>                                                                                                                   | 337 |
| Ground Beetles of the Tribe Sphodrini (Coleoptera, Carabidae) of East Europe                                                                                                 |     |
| <i>A. V. Putchkov and O. R. Aleksandrowicz</i>                                                                                                                               | 342 |
| New Species of the Bristletail Genus <i>Coryphophthalmus</i> Verh. (Archaeognatha, Machilidae) from the Caucasus                                                             |     |
| <i>V. G. Kaplin</i>                                                                                                                                                          | 365 |
| A New Species of the Genus <i>Conophyma</i> Zubovsky (Orthoptera, Acrididae) from Tajikistan                                                                                 |     |
| <i>A. A. Pokivailov and K. S. Khayrov</i>                                                                                                                                    | 405 |
| A New Species of the Genus <i>Phytomastax</i> Bey-Bienko (Orthoptera, Eumastacidae) from Tajikistan                                                                          |     |
| <i>A. A. Pokivailov</i>                                                                                                                                                      | 410 |

New Records and New Combinations of Idiocerini and Agalliini Leafhoppers  
(Hemiptera, Auchenorrhyncha: Cicadellidae) from Madagascar

*V. M. Gnezdilov and Qingquan Xue*

416

A New Species of the Scarab Genus *Aegidium* Westwood (Coleoptera, Scarabaeidae:  
Orphninae) from Bolivia

*A. V. Frolov and L. A. Akhmetova*

426

Description of a New Species of *Scolytopsis* Blandford, 1896 (Coleoptera, Curculionidae:  
Scolytinae) from Peru

*A. V. Petrov*

430

Emended Description and New Data on the Distribution of *Eurytoma campanulae* Zer.  
(Hymenoptera, Chalcidoidea: Eurytomidae)

*M. D. Zerova and S. I. Klimenko*

434

Essays on the Systematics and Biology of Five Encyrtid-Wasp Genera, *Ceraptocerella* Girault, 1918;  
*Charitopsis* Trjapitzin, 1969; *Epanusia* Girault, 1913; *Schilleriella* Ghesquière, 1946;  
and *Taftia* Ashmead, 1904 (Hymenoptera, Chalcidoidea, Encyrtidae),  
of the World Fauna

*V. A. Trjapitzin*

437
