A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Fluid Dynamics* ISSN 0015-4628.

Modeling of the Three-Dimensional Flow of Polymer Melt in a Convergent Channel of Rectangular Cross-Section <i>K. B. Koshelev, G. V. Pyshnograi, M. Yu. Tolstykh</i>	315
Stability of Conducting Medium Flows between Plane Continuous Electrodes Inclined to the Horizon <i>A. P. Glinov</i>	322
A Study of Cavitation in a Vortex Generator of Flow-Through Type <i>O. V. Shmyrkov</i>	332
A Study of Behavior and Stability of an Advective Thermocapillary Flow in a Weakly Rotating Liquid Layer under Microgravity <i>N. S. Knutova and K. G. Shvarts</i>	340
Convective Interactions and Flow Stability in the Czochralski Model in the Case of Crystal Rotation <i>O. A. Bessonov</i>	351
Development of Concentration-Capillary Convection on an Interfacial Surface <i>R. V. Birikh, M. O. Denisova, and K. G. Kostarev</i>	361
Investigation of the Generation of Sound Waves Produced by Turbulent Jets <i>S. Yu. Krashennnikov, A. K. Mironov, D. E. Pudovikov, and P. D. Toktaliev</i>	371
Bulk Forces Removing the Crossflow in a Laminar Boundary Layer <i>S. V. Manuilovich</i>	387
Disturbance Evolution in Compressible Boundary Layers on Impermeable and Porous Surfaces under External Pressure Gradient <i>S. A. Gaponov and N. M. Terekhova</i>	398
Method of Near-Wall Conditions for Investigating Flows and Heat Transfer at High Turbulence Intensity <i>V. A. Aleksin</i>	412
Investigation of Cavitation in the Case of the Motion of a Cylindrical Body along a Wall <i>A. A. Monakhov</i>	430
Water Waves in a Longitudinally Oscillating Container <i>V. I. Bukreev and A. V. Chebotnikov</i>	435
Vertical Structure of the Velocity Field in the Waves on the Surface of a Viscous Liquid Covered by an Elastic Film <i>E. L. Averbukh, T. G. Talipova, and A. A. Kurkin</i>	442
Rate Coefficients of the Elementary Stages of Heterogeneous Catalytic Recombination of Dissociated Air on Thermal-Protective Coatings <i>A. A. Buchachenko, V. L. Kovalev, and A. A. Krupnov</i>	453
