|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Formation of Binary Salts in the System LiCl–CsCl–H <sub>2</sub> O<br><i>O. N. Pestova, V. E. Baranaukaite, and M. K. Khripun</i>                                                                                                                                                                                                 | 767 |
| Solubility of <i>d</i> -Element Salts in Organic and Aqueous–Organic Solvents:<br>II. Effect of Halocomplex Formation on Solubility of Cobalt Bromide<br>and Chloride and Nickel Chloride<br><i>A. O. Gorbunov, N. A. Tsyrl'nikov, A. A. Tikhomirova, N. A. Bogachev,<br/>M. Yu. Skripkin, A. B. Nikolskii, and O. N. Pestova</i> | 771 |
| Thermochemical Study of Gaseous Salts of Oxygen-Containing Acids: XXI. Zinc Phosphate<br><i>S. I. Lopatin, S. M. Shugurov, A. I. Panin, and I. V. Prikhod'ko</i>                                                                                                                                                                  | 778 |
| Solid-State Synthesis of Nanocrystalline Strontium Zirconate Assisted by Mechanical Activation<br><i>A. M. Kalinkin, K. V. Balyakin, V. N. Nevedomskii, and E. V. Kalinkina</i>                                                                                                                                                   | 785 |
| Structure and Photocatalytic Properties of Materials Based<br>on Titanium Dioxide and Silver Nanoparticles<br><i>A. Yu. Vakhrushev, V. V. Gorbunova, T. B. Boitsova, and V. M. Stozharov</i>                                                                                                                                      | 792 |
| Colloid and Nanosized Catalysts in Organic Synthesis: XIV. Reductive Amination and Amidation<br>of Carbonitriles Catalyzed by Nickel Nanoparticles<br><i>Yu. V. Popov, V. M. Mokhov, and K. V. Shcherbakova</i>                                                                                                                   | 798 |
| Structure of Aminonitrones and Electronic Effect of Substituents on Their Acid-Base Properties<br><i>M. V. Il'in, D. S. Bolotin, M. Ya. Demakova, and M. S. Avdontseva</i>                                                                                                                                                        | 806 |
| Approach to Preparative Synthesis of <i>ortho</i> -(1-Methylbut-2-en-1-yl)anilines,<br>Precursors of New Cytotoxic Heterocycles<br><i>L. A. Aleksandrova, M. F. Abdullin, Yu. V. Vakhitova, and R. R. Gataullin</i>                                                                                                               | 810 |
| Study of Acid-Base Properties of Morin by Tristimulus Colorimetry<br><i>A. N. Chebotarev and D. V. Snigur</i>                                                                                                                                                                                                                     | 815 |
| Synthesis and Reactivity of Maleopimaric Acid <i>N</i> -Aryl(aralkyl)imidoamides<br><i>M. P. Bei, A. P. Yuvchenko, O. V. Sokol, and N. V. Puchkova</i>                                                                                                                                                                            | 821 |
| New Method of Preparation of Carboxy-Protected Amino Acid Conjugates of Glycyrrhizinic Acid<br><i>L. A. Baltina Jr., A. I. Fairushina, and L. A. Baltina</i>                                                                                                                                                                      | 826 |
| New Derivatives of 2-Mercaptobenzotellurazole<br><i>A. M. M. Ali, P. A. Ramazanov, G. M. Abakarov,<br/>A. V. Tarakanova, and A. V. Anisimov</i>                                                                                                                                                                                   | 830 |
| The Effect of Functional Substitution on Thermal Stability<br>of Pyridinylporphyrins under Argon Atmosphere<br><i>N. M. Berezina, Do Ngoc Minh, Yu. I. Tikhonova, N. N. Tumanova, S. S. Guseinov,<br/>M. I. Bazanov, M. B. Berezin, A. V. Glazunov, and A. S. Semeikin</i>                                                        | 835 |
| Synthesis, Spectral Luminescent Properties, and Photostability<br>of Monoiodo- and Dibromo-Substituted BF <sub>2</sub> -Dipyrinates<br><i>E. N. Nuraneeva, G. B. Guseva, E. V. Antina,<br/>R. T. Kuznetsova, M. B. Berezin, and A. I. V'yugin</i>                                                                                 | 840 |
| Phthalocyanines Containing Macrocyclic and Azo Chromophores in the Molecule<br><i>T. V. Tikhomirova, O. M. Gruzdeva, N. E. Galanin, G. P. Shaposhnikov, and I. G. Abramov</i>                                                                                                                                                     | 848 |
| Synthesis and Association in Dichloromethane Solution<br>of Low-Symmetry Phenoxy(fluoro)-Substituted Nickel Phthalocyaninates<br><i>A. I. Koptyaev, N. E. Galanin, and G. P. Shaposhnikov</i>                                                                                                                                     | 854 |

|                                                                                                                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Adducts of Tetracoordinate Cobalt(II) Complexes and 1-(Pyridin-2-yl)methanimine:<br>Computational Search for Valence Tautomeric Systems<br><i>A. G. Starikov, A. A. Starikova, and V. I. Minkin</i>                                                                                                     | 859 |
| Synthesis of 2-(Diphenylphosphoryl)phenyl Ethers of Ethylene Glycols<br>and Structure of Their Sodium and Potassium Complexes<br><i>I. S. Ivanova, I. N. Polyakova, V. E. Baulin,<br/>E. N. Pyatova, E. S. Krivorot'ko, and A. Yu. Tsivadze</i>                                                         | 865 |
| Synthesis and Structure of Enaminoketones of Pyrazole Containing 2-Thione(selenone)benzimidazolyl<br>Fragments and Their Zinc and Cadmium Complexes<br><i>I. G. Borodkina, A. S. Burlov, G. S. Borodkin, V. V. Chesnokov,<br/>T. A. Kuzmenko, A. I. Uraev, E. V. Korshunova, and I. S. Vasil'chenko</i> | 876 |
| New Methacrylate-Containing Derivatives of Hydroxyethyl Starch<br><i>A. A. Morgacheva, A. A. Artyukhov, P. A. Flegontov, E. S. Zhavoronok,<br/>M. I. Shtilman, A. V. Panov, and Ya. O. Mezhuev</i>                                                                                                      | 885 |
| Nafion-Based Composite Solid Electrolytes Containing Carbon Nanotubes<br><i>D. V. Postnov, V. N. Postnov, I. V. Murin, N. A. Mel'nikova, and A. G. Novikov</i>                                                                                                                                          | 890 |
| Nafion-Based Composite Solid Electrolytes Containing Water-Soluble Fullerene C <sub>60</sub> Derivatives<br><i>D. V. Postnov, V. N. Postnov, I. V. Murin, N. A. Mel'nikova, and K. N. Semenov</i>                                                                                                       | 894 |
| Glycine Adsorption on a Mercury Electrode Modified by Neodymium<br><i>A. V. Laptchenkova, N. G. Sukhodolov, A. I. Yanklovich, I. V. Prikhod'ko,<br/>A. V. Fedorova, A. A. Selyutin, and S. S. Ermakov</i>                                                                                               | 897 |
| Transition Metal Chelates: Synthesis, Physicochemical, Thermal, and Biological Studies<br><i>N. J. Suryawanshi, G. B. Pethe, A. R. Yaul, and A. S. Aswar</i>                                                                                                                                            | 901 |
| Microwave-Assisted Synthesis of 1-{2-[(1-Benzyl-1 <i>H</i> -1,2,3-triazol-4-yl)methoxy]phenyl}-<br>3-(3-aryl-1-phenyl-1 <i>H</i> -pyrazol-4-yl)prop-2-en-1-ones and Their Antimicrobial Activity<br><i>D. Ashok and K. Padmavati</i>                                                                    | 907 |
| Preparation of Graphene Oxide and Its Application in Ni <sup>2+</sup> Removal<br><i>Xuefang Zheng, Wenlong Hou, Qi Lian, and Haixia Wu</i>                                                                                                                                                              | 915 |
| Synthesis of Some Novel S-Alkylated and S-Glycosylated Hydantoin Derivatives<br>Containing Pyrene Moiety<br><i>N. M. Khalifa, E. S. Nossier, M. A. Al-Omar, and A. E. Amr</i>                                                                                                                           | 919 |
| Multiple Hydrogen Bonds-Mediated Formation of Supramolecular Polysiloxanes Based<br>on Oligoamide Duplexes<br><i>K. Luo, W. Wang, R. Cao, and W. Feng</i>                                                                                                                                               | 924 |
| Microwave Assisted Selective Synthesis of ( <i>E</i> )-1-(4-Chloro-7-hydroxy-2-aryl-2 <i>H</i> -chromen-6-yl)-<br>3-arylprop-2-en-1-ones and Their Antimicrobial Activity<br><i>D. Ashok, M. Sarasija, D. Shravani, B. Vijayalaxmi, and K. Sudershan</i>                                                | 930 |
| One-Pot Synthesis of Xanthene Derivatives Catalyzed by Fe(III) Tetrantrophthalocyanine<br>Immobilized on Activated Carbon<br><i>H. Huang, Y. Yao, Q. Lin, J. Zhao, C. Hua, and X. Gou</i>                                                                                                               | 934 |
| Synthesis of Novel Heptaplatin Derivatives and Evaluation of Their Ability to Inhibit<br>Proliferation of Cancer Cell Lines<br><i>W. Xu and D. C. Wang</i>                                                                                                                                              | 939 |
| Synthesis of Pyridinecarboxaldimine Grafted to Magnetic Nanoparticles (Fe <sub>3</sub> O <sub>4</sub> @SiO <sub>2</sub> )<br>and Its Application in the Aerobic Oxidation of Primary Alcohols Catalyzed by CuBr <sub>2</sub> /TEMPO<br><i>Y. C. Zhang, X. C. Sun, Z. M. Guo, L. Su, and J. Q. Zhao</i>  | 944 |
| Synthesis, Crystal Structure, and Magnetic Characteristics<br>of Chiral Cyanide-Bridged Fe–Cu Complex<br><i>C. Xue, H. Yuan, H. Zhang, and D. Zhang</i>                                                                                                                                                 | 953 |
| Green Synthesis of New Ge(IV) Complexes with Bio-Potent Ligands and Their Antimicrobial,<br>DNA Cleavage, and Antioxidant Activities<br><i>N. Fahmi, R. Khedar, and R. V. Singh</i>                                                                                                                     | 958 |

|                                                                                                                                                                                                                                                                                              |     |
