Numerical Analysis of Nonsteady-State Conjugate Natural Convection between Two Concentric Spheres <i>M. A. Sheremet</i>	1
Dynamics of Local Density Perturbation in Stably Stratified Fluid: Results of Numerical Experiments <i>G. G. Chernykh and A. N. Zudin</i>	13
Numerical Solution to the Plane Heat-Mass Transfer Problem in a System of Focused Radiation Flux—Liquid Condensed Substance Film—Oxidizer <i>O. V. Vysokomornaya, G. V. Kuznetsov, and P. A. Strizhak</i>	34
Mass Spectrometry of Molecules and Radicals in Glow Discharge Plasma <i>A. E. Belikov, S. Z. Sakhapov, M. A. Smith, and G. Tikhonov</i>	42
The Influence of Fe, Cu, SiO ₂ , TiO ₂ , and Al ₂ O ₃ Nanoparticles in Aqueous Solution on Proton Relaxation Times <i>E. G. Bagryanskaya, O. A. Krumkacheva, A. E. Belikov, V. A. Maltsev, and S. A. Novopashin</i>	55
Numerical Simulation of Experiments on Turbulent Natural Convection of Heat Generating Liquid in Cylindrical Pool <i>A. S. Filippov</i>	64
Modeling of the Vaporization Front on a Heater Surface <i>S. P. Aktershev and V. V. Ovchinnikov</i>	77
Generalized Wall Functions for Turbulent Flows with Strong Adverse Pressure Gradient <i>D. Ph. Sikovsky</i>	89
Gas-Solid Phase Calculations of Binary Mixtures Using Optimization of Evolutionary Algorithms <i>J. A. Lazzús and L. O. Palma Chilla</i>	101
Description of Polymer Solutions Phase Equilibria by Cubic Equation of State with Different Mixing Rules <i>Mehdi Baniasadi, Maryam Baniasadi, and Sattar Ghader</i>	115
