Transient Thermal Analysis of a Cryogenic Oxidizer Tank in the Liquid Rocket
Propulsion System during the Prelaunch Helium Gas Pressurization

K. H. Kim, H.-J. Ko, K. Kim, Y.-S. Jung, S.-H. Oh, and K.-J. Cho 1

Interrelation of Anode and Cathode Processes in Electrochemical
Carbon Oxidation in a Fuel Cell with Molten Carbonate Electrolyte

Yu. D. Varlamov, M. P. Predtechenskii, and S. N. Ulyankin 16

Flow Boiling Heat Transfer of Water in Microchannel Heat Sink

V. V. Kuznetsov and A. S. Shamirzaev 28

Thermocapillary Waves in a Liquid Film

S. P. Aktershev 36

Effect of Diluent Gas on Silicon Film Deposition
from a Free Jet of Monosilane–Diluent Mixture
Activated by Electron-Beam Plasma

S. Ya. Khmel 52

Measurement of Thermal Conductivity of Fluids Using $3-\omega$ Method
in a Suspended Micro Wire

R. Karthik, N. Harish Nagarajan, B. Raja, and P. Damodharan 60

Heat and Mass Transfer at Ignition of Solid Condensed Substance
with Relatively Low Calorific Power by a Local Energy Source

D. O. Glushkov and P. A. Strizhak 69

Numerical Modeling of 3D Convection in the Upper Mantle
of the Earth beneath Lithosphere of Central Asia

V. V. Chervov and G. G. Chernykh 78

Comparison of Thermoluminescence Energy Response of Optical Fiber
Subject to Photon Irradiation between Monte Carlo Simulation and Experiments

H. Wagiran, I. Hossain, H. Asni, and A. T. Ramli 90
