Atoms, Molecules, Optics

- Bremsstrahlung Radiation from Slow Electrons in a Coulomb Field:
Classical Limit and Quantum Correction
N. L. Manakov, A. A. Krylovetsky, and S. I. Marmo 727
- Preablation Electron and Lattice Dynamics on the Silicon Surface Excited
by a Femtosecond Laser Pulse
A. A. Ionin, S. I. Kudryashov, L. V. Seleznev, D. V. Sinitsyn, V. N. Lednev, and S. M. Pershin 737
- Simple Model of the Indirect Compression of Targets under Conditions Close
to the National Ignition Facility at an Energy of 1.5 MJ
V. B. Rozanov and G. A. Vergunova 747
- Influence of the Finite Linewidth of the Laser Radiation Spectrum on the Shape
of the Coherent Population Trapping Resonance Line in an Optically Dense Medium
with a Buffer Gas
K. A. Barantsev, E. N. Popov, and A. N. Litvinov 758
- Nonclassical Properties and Quantum Resources of Hierarchical Photonic Superposition States
T. J. Volkoff 770
- Spatiotemporal Optical Pulse Transformation by a Resonant Diffraction Grating
N. V. Golovastikov, D. A. Bykov, L. L. Doskolovich, and V. A. Soifer 785
- Sub-Poissonian Phonon Statistics in an Acoustical Resonator Coupled
to a Pumped Two-Level Emitter
V. Ceban and M. A. Macovei 793
- Interaction of Rydberg Atoms in Circular States with the Alkaline-Earth $\text{Ca}(4s^2)$ and $\text{Sr}(5s^2)$ Atoms
E. S. Mironchuk, A. A. Narits, and V. S. Lebedev 799
-

Nuclei, Particles, Fields, Gravitation, and Astrophysics

- Resonant Generation of an Electron–Positron Pair by Two Photons to Excited Landau Levels
M. M. Diachenko, O. P. Novak, and R. I. Kholodov 813
- Stability of the Lepton Bag Model Based on the Kerr–Newman Solution
A. Burinskii 819
-

Solids and Liquids

- Short-Range Order and Dynamics of Atoms in Liquid Gallium
A. V. Mokshin, R. M. Khusnutdinoff, A. G. Novikov, N. M. Blagoveshchenskii, and A. V. Puchkov 828
-

Order, Disorder, and Phase Transition in Condensed System

- Galvanomagnetic Properties of Fe_2YZ ($\text{Y} = \text{Ti, V, Cr, Mn, Fe, Ni}$; $\text{Z} = \text{Al, Si}$) Heusler Alloys
N. I. Kourov, V. V. Marchenkov, K. A. Belozeroval, and H. W. Weber 844
- Effect of Nonmagnetic Defects on Superconducting and Transport Properties
of $\text{Ba}(\text{Fe}_{1-x}\text{Co}_x\text{As})_2$ High- T_c Superconductors
*I. S. Blokhin, S. Yu. Gavrilkin, B. P. Gorshunov, V. A. Dravin, E. S. Zhukova, O. M. Ivanenko,
K. Aida, S. I. Krasnosvobodtsev, F. Kurt, K. V. Mitsen, and A. Yu. Tsvetkov* 853
- Quantum Renormalizations in Anisotropic Multisublattice Magnets
and the Modification of Magnetic Susceptibility under Irradiation
V. V. Val'kov and M. S. Shustin 860

Evaluation of the Effect of Various Mechanisms on the Magnetoresistance of Lanthanum Manganites $\text{La}_{0.85}\text{Sr}_{0.15}\text{MnO}_3$ with Activation-Type Conductivity <i>S. A. Gudin, M. I. Kurkin, E. A. Neifel'd, A. V. Korolev, N. N. Gapontseva, and N. A. Ugryumova</i>	878
---	-----

Electronic Properties of Solid

Multifractality and Quantum Diffusion from Self-consistent Theory of Localization <i>I. M. Suslov</i>	885
--	-----

Statistical, Nonlinear, and Soft Matter Physics

Acoustical Analog of the Fréedericksz Transition in Liquid Crystals <i>O. A. Kapustina, E. N. Kozhevnikov, and E. K. Negazina</i>	902
Electrostatic Interaction of Two Charged Macroparticles in an Equilibrium Plasma <i>A. V. Filippov, A. F. Pal', and A. N. Starostin</i>	909
