

JOURNAL OF STRUCTURAL CHEMISTRY

A translation of *Zhurnal Strukturnoi Khimii*

Volume 51, Supplement

December, 2010

CONTENTS

Engl./Russ.

A New Method for Estimating the Dispersity of Deposited Metallic Nanoparticles and Extent of Their Interaction with the Support Matrices — F. V. Tuzikov, I. É. Beck, N. A. Tuzikova, and V. I. Bukhtiyarov	S1	7
Study of the Local Structure of Supported Nanostructural Platinum Catalysts — I. É. Beck, V. V. Kriventsov, D. P. Ivanov, E. P. Yakimchuk, B. N. Novgorodov, V. I. Zaikovskii, and V. I. Bukhtiyarov	S11	17
An <i>in Situ</i> Cell for Investigation of the Catalyst Structure Using Synchrotron Radiation — A. A. Veligzhanin, Ya. V. Zubavichus, A. A. Chernyshov, A. L. Trigub, A. S. Khlebnikov, A. I. Nizovskii, A. K. Khudorozhkov, I. É. Beck, and V. I. Bukhtiyarov	S20	26
Modern Solid-State NMR of Quadrupolar Nuclei — O. B. Lapina, D. F. Khabibulin, and A. A. Shubin	S28	33
Using <i>Ex Situ</i> X-Ray Powder Diffraction at Synchrotron Radiation to Follow Changes in the Phase Composition of Perovskite-Like Strontium Cobaltites — M. G. Ivanov, A. N. Shmakov, O. Yu. Podyacheva, and Z. R. Ismagilov	S47	52
Application of Secondary Ion Mass Spectrometry for Analyzing the Composition and Structure of Surface Layers of Fine Materials — V. P. Ivanov	S53	58
XPS Spectra of Vanadium-Doped Disulfides CuCrS_2 — L. N. Mazalov, Yu. P. Dikov, N. A. Kryuchkova, V. V. Sokolov, I. Yu. Filatova, E. A. Korotaev, and A. D. Fedorenko	S59	64
Study of the Properties and Structure of Nanosize Membranes for Acousto-Optic Devices — B. M. Ayupov, V. V. Bakovets, A. G. Paulish, V. N. Fedorinin, and V. S. Danilovich	S68	73
XRD and EXAFS Study of Nitrate Ammine Complexes of Nitrosyl Ruthenium — E. V. Kabin, V. A. Emel'yanov, I. A. Baidina, T. I. Nedoseykina, and V. A. Vorob'yov	S73	78
Micellar Synthesis and Characterization of Ultradispersed Powders of Ammonium Nitrate — A. I. Bulavchenko, A. I. Shkatulov, L. M. Plyasova, and T. Yu. Podlipskaya	S81	86
Investigation of Texture Characteristics of the Technosorb Carbon Material in the Oxidation Process — L. M. Levchenko and V. S. Golovizin	S87	92
Methods for Investigation of Holographic Photopolymer Materials — V. V. Shelkovnikov, E. F. Pen, E. V. Vasilyev, I. Sh. Steinberg, P. E. Tverdokhle, and Yu. A. Shepetkin	S91	96
Structural Characterization of Iron Silicide Nanoclusters in Si/FeSi Heterosystems Using Magneto-Optic Ellipsometry — N. N. Kosyrev, V. N. Zabluda, S. N. Varnakov, V. A. Shvets, S. V. Rykhlytsky, E. V. Spesivtsev, and V. Yu. Prokop'ev	S100	104
Synthesis and Properties of Silver and Gold Nanocomposites in Poly-1-vinyl-1,2,4-triazole Matrix — G. F. Prozorova, S. A. Korzhova, T. V. Kon'kova, T. G. Ermakova, A. S. Pozdnyakov, A. N. Sapozhnikov, O. A. Proydakova, B. G. Sukhov, K. Yu. Arsentyev, E. V. Likhoshvai, and B. A. Trofimov	S105	109

CONTENTS

(continued)

Engl./Russ.

Structural and Functional Diagnostics of Ultrafine Components in Condensed High-Energy Systems — N. V. Muravyov, K. A. Monogarov, D. B. Meerov, D. A. Ivanov, O. S. Ordzhonikidze, Yu. V. Frolov, A. N. Pivkina, A. A. Korlyukov, and I. S. Bushmarinov	S109	113
Possibilities of Thermoluminescence Method for Estimating the Molecular Packing in Near-Surface Layers of Polymers — D. V. Lebedev, E. N. Vlasova, E. M. Ivan'kova, A. A. Kalachev, V. A. Marikhin, L. P. Myasnikova, A. V. Naschekin, and E. I. Radovanova	S116	120
Thermokinetic Modeling of Octogen Decomposition Using the Simultaneous Thermal Analysis Data — O. S. Ordzhonikidze, A. N. Pivkina, Yu. V. Frolov, N. V. Muravyev, K. A. Monogarov, and I. V. Fomenkov	S125	129
Synthesis and Structural Study of the Ordered Germanium Nanorod Arrays — R. G. Valeev, D. V. Surnin, A. N. Beltyukov, V. M. Vetoshkin, V. V. Kriventsov, Ya. V. Zubavichus, N. A. Mezentsev, and A. A. Eliseev	S132	135
Structural Study of Synthesized Microcapsulated Extractants Using IR Spectroscopy and Electron Microscopy — A. G. Shirokova, L. A. Pasechnik, S. P. Yatsenko, S. V. Borisov, and I. G. Grigorov	S137	140
Composition and Structure of Calcium Gluconate and Its Mechanoactivated (Nanodispersed) Form — D. R. Sharafutdinova, Yu. Ya. Efremov, I. H. Rizvanov, G. N. Konygin, D. S. Rybin, and N. S. Strelkov	S142	145
A Comprehensive Structural Analysis of Silicon Carbide Layers Grown by Vacuum Epitaxy on Silicon from Hydrides and Hydrocarbons — L. K. Orlov, Yu. N. Drozdov, M. N. Drozdov, O. A. Pod'yacheva, and V. I. Vdovin	S145	148
Stoichiography for Investigation of the Functional Materials Composition, Structure and Properties — V. V. Malakhov	S152	155
Study of Poly(1-trimethylsilyl-1-propyne) Aging by Gas Chromatography — V. Yu. Belotserkovskaya and E. Yu. Yakovleva	S159	162
Investigation of Structure and Properties of Divinylbenzene–Styrene Copolymer Films — O. A. Nikolaeva, Yu. V. Patrushev, and V. N. Sidelnikov	S164	167
Solid State Voltammetry for Diagnostics of Functional Materials — N. F. Zakharchuk, T. P. Smirnova, and V. E. Fedorov	S168	171
CHN Analysis of Functional Materials and Their Precursors — O. S. Koshcheeva, A. P. Zubareva, and A. I. Saprykin	S175	178
Elemental Composition Analysis of Silicon Carbonitride thin Films by Energy Dispersive Spectroscopy — Yu. M. Rumyantsev, N. I. Fainer, E. A. Maximovskii, and B. M. Ayupov	S179	182
Composition Determination of Post-Metallocene Olefin Polymerization Catalysts — V. P. Fadeeva, V. D. Tikhova, O. N. Nikulicheva, I. I. Oleynik, and I. V. Oleynik	S186	188
Atomic-Emission Analysis of High-Purity Oxides with Concentration of Impurities by Distilling off the Matrix During Fluorination in Autoclave — I. I. Evdokimov, M. M. Lipatova, and V. G. Pimenov	S192	193
ICP-AES Analysis of Aluminum Isopropoxide, Yttrium, and Neodymium Oxide Nanopowders — I. I. Evdokimov and V. G. Pimenov	S197	198
Estimation of the Phase Composition of Electrolytic Deposits Containing Platinum and Gold — N. A. Kolpakova, É. V. Gorchakov, É. M. Gabdurahmanova, and T. S. Glyzina	S203	203
