APPLICATIONS OF SYNCHROTRON RADIATION IN STRUCTURAL CHEMISTRY

Synchrotron Radiation in Novosibirsk: the First 13 Years — G. N. Kulipanov, N. A. Mezentsev, and V. F. Pindyurin	1277	1351
Research on Fast Solid-State Chemical Reactions at the Siberian Synchrotron and Terahertz Radiation Center — B. P. Tolochko and K. V. Zolotarev	1288	1362
Modeling of Plasma Interaction with First Wall in Fusion Reactor – Measuring Residual Mechanical Stresses in Tungsten after Irradiation at GOL-3 Facility — A. S. Arakcheev, A. N. Shmakov, M. R. Sharafutdinov, B. P. Tolochko, V. A. Popov, A. A. Shoshin, A. A. Vasilyev, D. I. Skovorodin, S. V. Polosatkin, A. V. Burdakov, I. A. Bataev, and V. A. Bataev	1314	1389
The Modified Experimental X-Ray Powder Diffraction Station on the SR Beamline No. 2 of VEPP-3 Storage Ring — A. N. Shmakov, B. P. Tolochko, E. N. Dementiev, and M. A. Sheromov	1321	1395
X-Ray Fluorescent Analysis Using Synchrotron Radiation: Subjects of Research — V. A. Trunova and V. V. Zvereva	1327	1401
Experimental and Theoretical Study of X-Ray <i>K</i> Edges Absorption Spectra of Carbon and Nitrogen in the Phthalocyanine H ₂ Pc Molecule — G. I. Semushkina, L. N. Mazalov, and T. V. Basova	1334	1408
Theoretical and Experimental Study of Mononuclear Cu(II) Acetate-Bipyridine Complex — M. A. Kremennaya, M. A. Soldatov, A. P. Budnyk, T. A. Lastovina, and A. V. Soldatov	1348	1423
XANES of X-Ray Absorbtion <i>K</i> Edges of Chromium Dichalcogenides CuCr _{1-x} M' _x S ₂ and MCrX ₂ — E. V. Korotaev, V. V. Kanazhevskiy, N. N. Peregudova, M. M. Syrokvashin, L. N. Mazalov, V. V. Sokolov, I. Yu. Filatova, and A. Yu. Pichugin	1355	1430
Synchrotron Radiation Diffraction Study of Structural Changes in the Interaction of Liquid and Solid Metals — A. I. Ancharov and K. V. Zolotarev	1362	1438
Modelling of Substitutional Defects in the Structure of Ti-Bearing Hibonite — I. A. Pankin, A. N. Kravtsova, O. E. Polozhentsev, and A. V. Soldatov	1369	1445
Structural Evolution of Li-Exchaned Natrolite at Pressure-Induced Over-Hydration: an X-Ray Diffraction Study — Yu. V. Seryotkin, A. Yu. Likhacheva, and S. V. Rashchenko	1377	1453
The Influence of Extraframework Cations on the Behavior of K-Exchanged Gonnardite at High Pressure — Yu. V. Seryotkin, S. N. Dement'ev, and A. I. Ancharov	1386	1463
Formation of the High-Pressure Modification of Hydrated Talc at 450°C and 4 GPa: <i>in Situ</i> Diffraction Study — A. Yu. Likhacheva and S. V. Rashchenko	1392	1469
PtPd-Nanoparticles Supported by New Carbon Materials — T. I. Asanova, I. P. Asanov, V. A. Tur, E. Yu. Gerasimov, and M. Brzhezinskaya	1398	1475

CONTENTS

(continued)

Engl./Russ.

Microstructure of Multilayer Heterosystems Containing Molecules of Ge Quantum Dots in Si on the Stages of Nucleation and Growth as Revealed by EXAFS Spectroscopy — S. B. Erenburg, S. V. Trubina, V. V. Zvereva, V. A. Zinov'ev, A. V. Dvurechenskiy, P. A. Kuchinskaya, and K. O. Kvashnina	1407	1485
Structural Study of Light-Emitting Nanocomposites Based on ZnS:Cu Deposited by Explosive Evaporation Method on Porous Anodic Al ₂ O ₃ Matrices — A. N. Beltyukov, A. I. Chukavin, R. G. Valeev, A. L. Trigub, I. A. El'kin, V. V. Kriventsov, and N. A. Mezentsev	1417	1496
Analysis of the Local Atomic Structure of Quantum Dots of the CdS Family — A. N. Kravtsova, I. A. Pankin, M. A. Soldatov, V. V. Butova, I. A. Bobrova, and A. V. Soldatov	1422	1501
Analysis of the Atomic Structure of Colloidal Quantum Dots of the CdSe Family: X-Ray Spectral Diagnostics and Computer Modelling — I. A. Pankin, A. N. Kravtsova, O. E. Polozhentsev, A. L. Trigub, M. A. Soldatov, and A. V. Soldatov	1429	1508
Towards the Optimization of Carbon Nanotube Properties via <i>in Situ</i> and <i>ex Situ</i> Studies of the Growth Mechanism — D. V. Krasnikov, A. N. Shmakov, V. L. Kuznetsov, and A. V. Ishchenko	1436	1515
Structural Studies of Magnetic Nanoparticles Doped with Rare-Earth Elements — T. A. Lastovina, A. L. Bugaev, S. P. Kubrin, E. A. Kudryavtsev, and A. V. Soldatov	1444	1523
Local Peculiarities of the Nanocrystalline Structure of Ternary Oxides Ln ₂ Hf ₂ O ₇ (Ln= Gd, Tb, Dy) — A. P. Menushenkov, V. V. Popov, Ya. V. Zubavichus, and A. A. Yaroslavtsev	1450	1529
Structure and Magnetic Properties of Pure and Samarium Doped Magnetite Nanoparticles — O. E. Polozhentsev, S. P. Kubrin, V. V. Butova, V. K. Kochkina, A. V. Soldatov, and V. V. Stashenko	1459	1539
Investigation of Adamantane–Diamond Transformation. The Radical Mechanism of the Formation of Diamond Nanoparticles under Shock-Wave Action on Adamantane — B. P. Tolochko, A. P. Chernyshev, B. B. Bokhonov, K. A. Ten, E. R. Pruel, and N. Z. Lyakhov	1469	1550
Molecular and Electronic Structure of Hydrolized Platinum Anticancer Drugs as Revealed by X-Ray Absorption, IR, UV-Vis Spectroscopies and DFT Calculations — O. E. Polozhentsev, V. K. Kochkina, V. L. Mazalova, and A. V. Soldatov	1477	1558

BRIEF COMMUNICATIONS

Compressibility and Phase Transitions of Potassium Carbonate at Pressures below 30 kbar — P. N. Gavryushkin, S. V. Rashenko, A. F. Shatskiy, K. D. Litasov, and A. I. Ancharov	1485	1566
Compressibility, Phase Transitions and Amorphization of Coronene at Pressures up to 6 GPa — A. D. Chanyshv, A. Yu. Likhacheva, P. N. Gavryushkin, and K. D. Litasov	1489	1570
