Lie Group Analysis

Moving Frames and Differential Invariants in Centro–Affine Geometry <i>P. J. Olver</i> (Submitted by <i>N.H. Ibragimov</i>)	77
Pricing Options in Illiquid Markets: Optimal Systems, Symmetry Reductions and Exact Solutions <i>L. A. Bordag</i> (Submitted by <i>N.H. Ibragimov</i>)	90
Group Analysis of Variable Coefficient Diffusion–Convection Equations. I. Enhanced Group Classification <i>N. M. Ivanova, R. O. Popovych, and C. Sophocleous</i> (Submitted by <i>N.H. Ibragimov</i>)	100
Exact and Approximate Symmetries for Light Propagation Equations with Higher Order Nonlinearity <i>M. E. Garcia, V. F. Kovalev, and L. L. Tatarinova</i> (Submitted by <i>N.H. Ibragimov</i>)	123
Integration of Ordinary Differential Equation with a Small Parameter Via Approximate Symmetries: Reduction of Approximate Symmetry Algebra to a Canonical Form <i>R. K. Gazizov, N. H. Ibragimov, and V. O. Lukashchuk</i> (Submitted by <i>N.H. Ibragimov</i>)	141
Classification of Three-Dimensional Lie Algebras in \mathbb{R}^3 and Their Second-Order Differential Invariants <i>S. V. Khabirov</i> (Submitted by <i>N.H. Ibragimov</i>)	152
Group Analysis of Non-Autonomous Linear Hamiltonians Through Differential Galois Theory <i>D. Blázquez-Sanz and S. A. Carrillo Torres</i> (Submitted by <i>N.H. Ibragimov</i>)	157
An Alternative Presentation of the Method of Variation of Parameters for Higher-Order Equations <i>N. H. Ibragimov</i> (Submitted by <i>N.H. Ibragimov</i>)	174
Petrophysics Laws as Invariants of Filtration Model <i>V. A. Baikov, L. R. Galiakberova, V. G. Volkov, and I. S. Zheltova</i> (Submitted by <i>N.H. Ibragimov</i>)	192
