Vol. 54, No. 1, 2019

---

---

|   |     |
|---|-----|
| Pulsed Optimal Spacecraft Orbit Reorientation by Means of Reactive Thrust Orthogonal to the Osculating Orbit. II<br><i>Ya. G. Sapunkov and Yu. N. Chelnokov</i>   | 1   |
| The Skidding Modelling of an Apparatus with Turned Front Wheels<br><i>A. V. Vlahova and A. P. Novoderova</i>  | 19  |
| Development of the Method for Determining the Modulus of Bulk Elasticity and Parameters Taking Into Account the Loosening and Changing of the Elasticity of Composites by Using the Tensor–Nonlinear Equations<br><i>K. F. Komkov</i> | 39  |
| Solution of the Kirsch Problem for a Plate Made of a Material with Nonuniform Thickness<br><i>G. Z. Sharafutdinov</i>   | 50  |
| Thermoelastic Instability in the Quasi-Static Coupled Thermoelasticity Problem Dealt with the Sliding Contact with Frictional Heating<br><i>V. B. Zelentsov and B. I. Mitrin</i>  | 58  |
| Construction of Linear Invariant Relations of Kirchhoff Equations<br><i>V. Yu. Ol'shanskii</i>  | 70  |
| About Stationary Movements of the Generalized Kovalevskaya Top and Their Stability<br><i>V. D. Irtegov and T. N. Titorenko</i>  | 81  |
| Optimal Control of Kinetic Moment During the Spatial Rotation of a Rigid Body (Spacecraft)<br><i>M. V. Levskii</i>  | 92  |
| Study of Forced Transverse Vibrations of Elastic Hinge-Operated Rod Taking Into Account Rotative Movement<br><i>K. Sh. Mkrtchyan</i>  | 112 |
| Basic Kinematic Hardening Rules Applied to 304 Stainless Steel and the Advantage of Parameters Evolution<br><i>M. Peč, F. Šebek, and J. Petruška</i>  | 122 |
| <b>ERRATA</b>   |     |
| Erratum to: Asymptotic Analysis of the Plane Strain State Generated by a Finite Longitudinal Shear Crack<br><i>B. A. Zhukov</i>   | 130 |
