Vol. 54, No. 3, 2019

Investigation of the unsteady creep of reinforced plates of nonlinearly inherited materials, taking into account the weakened resistance by transverse shear <i>A. P. Yankovskii</i>	365
Properties of the Set of Strain Diagrams Produced by Rabotnov Nonlinear Equation for Rheonomous Materials <i>A. V. Khokhlov</i>	384
Usage of Computer Mechanics in the Theory of Inertial Navigation Systems <i>V. Ph. Zhuravlev, D. M. Klimov, and P. K. Plotnikov</i>	400
Theory of Sound Barriers: Diffraction of Plane, Cylindrical and Spherical Waves on a “Hard-Soft” Half Plane <i>M. Sh. Israilov</i>	412
Spatiotemporal Distribution of Deformation Processes in Reinforced Concrete Structure under Shock-Wave Exposure (Simulation & Experiment) <i>I. O. Glot, V. P. Matveenkov, R. V. Tsvetkov, I. N. Shardakov, and A. P. Shestakov</i>	420
Stability of Rectilinear Motion of a Cone Rotating Around the Axis of Symmetry <i>K. Yu. Osipenko</i>	429
Investigation of Bending Stiffness for Flange Joint of GTE Rotor <i>A. L. Berne, M. K. Leont'ev, F. R. Nizametdinov, and Yu. S. Romashin</i>	435
Contact Interaction of a Plate with a Nonlinear Elastic Stringer <i>O. M. Jokhadze, S. S. Kharibegashvili, and N. N. Shavlakadze</i>	440
Layer-by-Layer Analysis of the Stress-Strain State of Three-Layer Shells with Cutouts <i>V. N. Bakulin</i>	448
Solution of a Mixed Boundary Value Problem of Nonlinear Creep Theory <i>S. M. Mkhitarian</i>	461
Analytical Quasi-Optimal Solution for the Problem on Turn Maneuver of an Arbitrary Solid with Arbitrary Boundary Conditions <i>A. V. Molodenkov and Ya. G. Sapunkov</i>	474
Effects of Elastic Supports on the Snap-through Buckling of Mises Trusses <i>J. Cai, J. Feng, and Y. Xu</i>	486
