Geomechanics

Procedure and Results of Seismic Investigations into Causes of Landslides in Permafrost Rocks	
<i>M. V. Kurlenya, G. S. Chernyshov, A. S. Serdyukov, A. A. Duchkov, and A. V. Yablokov</i>	835
Applications of Non-Archimedean Analysis in the Block Hierarchical Rock Mass Mechanics	
<i>A. F. Revuzhenko</i>	842
Calculation of Rock Mass Stresses Considering Rock Mass–Support Interaction in Mines	
<i>V. M. Seryakov</i>	851
Peak Loads on Feeders in Gravity Reclaim Stockpiles of Broken Rocks	
<i>A. A. Kramadzhyan, E. P. Rusin, S. B. Stazhevsky, and G. N. Khan</i>	857
Weak Waves under Periodic Load Applied to a Packing of Glass Balls	
<i>A. P. Bobryakov, V. P. Kosykh, and A. F. Revuzhenko</i>	866
Stress Dependence of Elastic P-Wave Velocity and Amplitude in Coal Specimens under Varied Loading Conditions	
<i>V. L. Shkuratnik, P. V. Nikolenko, and A. E. Koshelev</i>	873
Tensile Strength of Rocks by Test Data on Disc-Shaped Specimens with a Hole Drilled through the Disc Center	
<i>V. P. Efimov</i>	878
Determination of Plasticity Zone in Rock Mass with a Long Cylindrical Opening Based on the Boundary Displacement Measurements	
<i>A. I. Chanyshv and I. M. Abdulin</i>	885
Physical Simulation and Theoretical Estimate of Gravity-Induced Horizontal Stress in Rocks	
<i>I. L. Pan'kov</i>	892

Rock Failure

Experimental Regularities in Formation of Submicron Particles under Rock Failure	
<i>S. D. Viktorov and A. N. Kochanov</i>	899
Mechanical Properties of Coal Microcomponents under Continuous Indentation	
<i>E. L. Kossovich, N. N. Dobryakova, S. A. Epshtein, and D. S. Belov</i>	906

Science of Mining Machines

Experimental Estimate of Power Variation Range of Pneumatic Hammer with Mechanical Locking of Elastic Valve	
<i>V. V. Chervov and B. N. Smolyanitsky</i>	913
Remote Monitoring Systems for High-Voltage Substations and Mining Machines at Open Pit Coal Mines	
<i>I. V. Breido, A. V. Sichkarenko, and E. S. Kotov</i>	919
Double-Action Compression/Vacuum–Impact Machine	
<i>V. V. Timonin, A. K. Tkachuk, and V. N. Karpov</i>	927

Mineral Mining Technology

Geomechanical Assessment of Compound Mining Technology with Backfilling and Caving for Thick Flat Ore Bodies

A. M. Freidin, A. A. Neverov, and S. A. Neverov 933

New Technology and Equipment for Non-Explosive Formation of Free Face in Deep Open Pit Mines

S. Ya. Levenson, M. A. Lantsevich, L. I. Gendlina, and A. N. Akishev 943

Rockbolting Improvement in Coal Mines in Permafrost Regions

E. A. Razumov, V. I. Klishin, G. Yu. Opruk, and P. V. Grechishkin 949

Optimal Extraction Sequence Modeling for Open Pit Mining Operation Considering the Dynamic Cutoff Grade

E. Moosavi and J. Gholamnejad 956

Mineral Dressing

Determination of Activity/Selectivity Ratio in Physical and Chemical Adsorption of a Reagent

S. A. Kondrat'ev, N. P. Moshkin, and E. A. Burdakova 965

Mineralogical Test and Production Research of Gold Mine Waste

M. A. Gurman, L. I. Shcherbak, R. V. Bogomyakov, and E. V. Vylegzhanina 974

Composition and Properties of Highly Dispersed Particles Generated under Sulfide Ore Milling

*Yu. L. Mikhlin, S. A. Vorob'ev, S. V. Karasev, A. S. Romanchenko,
A. A. Karacharov, E. S. Kamensky, and E. A. Burdakova* 982

Effects of Surface Structure Changes on Reactivity of Scheelite after Mechanical Activation

E. V. Bogatyreva and A. G. Ermilov 989

Alteration of Water-Resistance Properties of Overburden under Influence of Sulfuric Acid

M. B. Nosyrev, A. I. Semyachkov, L. P. Parfenova, and V. V. Kuchin 998

Development of Sphalerite Activation Regularity by Copper Sulphate

M. Chettibi and A. A. Abramov 1003

Mining Ecology

Identification of Pollutant Clusters in Trade Effluents in Kuzbass

V. N. Oparin, V. P. Potapov, A. B. Logov, E. L. Schastlivtsev, and N. I. Yukina 1011

Environmental Mineralogy in Mineral Mining

V. A. Chanturia, E. G. Ozhogin, and I. V. Shadrunkova 1020

New Methods and Instruments in Mining

Down-the-Hole Unbalance Vibration Exciter for Seismic Treatment of Bottom-Hole Zone

*S. V. Serdyukov, L. A. Rybalkin, P. A. Dergach, A. S. Serdyukov,
and A. V. Azarov* 1024
