Vol. 26, No. 1, 2017

On the Lower Bound in Second Order Estimation for Poisson Processes: Asymptotic Efficiency <i>S. B. Gasparyan and Y. A. Kutoyants</i>	1
Saddlepoint Approximations to the Distribution of the Total Distance of the Multivariate Isotropic and von Mises–Fisher Random Walks <i>R. Gatto</i>	20
Asymptotic Behavior of Truncated Stochastic Approximation Procedures <i>T. Sharia and L. Zhong</i>	37
An Oracle Inequality for Quasi-Bayesian Nonnegative Matrix Factorization <i>P. Alquier and B. Guedj</i>	55
A Supermartingale Argument for Characterizing the Functional Hill Process Weak Law for Small Parameters <i>A. M. Fall, G. S. Lo, A. Adekpedjou, and C. H. Ndiaye</i>	68
