Contents

Vol. 82, No. 11, 2019

Promising Construction Materials

Study of ZrSiB Coatings Obtained by Magnetron Sputtering of ZrB_2–20%Si and ZrB_2–50%$ZrSi_2$ Cathodes

F. V. Kiryukhantsev-Korneev and I. V. Yatsyuk 1437

Study of Mechanical Characteristics of Stainless Steel Samples Obtained by Direct Laser Deposition

E. D. Ishkinyaev, V. N. Petrovskiy, V. I. Polskiy, P. S. Dzhumaev, K. L. Sergeev, A. S. Shcekin, D. V. Panov, and D. V. Ushakov 1441

Effect of Laser Annealing on Parameters of Hardened Zones and Their Tribological Properties

V. P. Biryukov, V. V. Isakov, A. Y. Fedotov, and D. A. Baulin 1445

Laser Cladding of Copper Alloys on Steel

V. P. Biryukov and T. A. Bazlova 1450

Materials and Technologies for New Power Sources

Formation of "Fuzz" on the Pre-Nitrided Tungsten Surface

T. R. Tulenbergenov, M. K. Skakov, I. A. Sokolov, D. A. Ganovichev, and A. Zh. Miniyazov 1454

Vortex System Dynamics upon Pulsed Magnetization of a HTS

A. N. Moroz, A. N. Maksimova, V. A. Kashurnikov, and I. A. Rudnev 1460

Mathematical Modeling in Nuclear Technologies

Modeling the Behavior of a MOS Transistor under Fast Neutron and Gamma Irradiation

M. A. Petukhov and A. I. Ryazanov 1466

Reliability of Neutron Yield Cross Sections on ^{12}C–^{127}I Isotopes in Proton-Induced Reactions Evaluated Using GEANT4 Package for Proton Therapy Applications

G. I. Bykhalo and K. A. Stopani 1476

Radial Distribution Functions for Molecules in the Universal Equation of State Model for Gaseous/Fluid/Condensed Systems

Yu. A. Bogdanova, S. A. Gubin, and I. V. Maklashova 1481

Molecular Dynamics Simulation of Thermal Decomposition of Hydrogen

A. V. Kudinov, Yu. A. Bogdanova, and S. A. Gubin 1486

Modeling the Properties of Helium at High Pressures

I. V. Maklashova, Y. A. Bogdanova, U. D. Vagina, and T. D. Tretyakova 1490

Engineering Design of Nuclear Physics Equipment

Magnetic Drag and Energy Losses in Noncontact Bearings Based on Superconducting Tapes

A. I. Podlivaev, I. A. Rudnev, and I. V. Anischenko 1494

Cluster Model of the Mechanism of Sensitivity of Gas Sensors Based on MIS Structures

A. V. Litvinov, N. N. Samotaev, M. O. Etrekova, Yu. A. Klishin, and N. A. Korolev 1499

Nonequilibrium States in HTS Tapes under the Action of Short Current Pulses

S. V. Pokrovskii, A. A. Bura, I. V. Anischenko, and I. A. Rudnev 1503

Laser Micromilling Technology as a Key for Rapid Ceramic MEMS Devices

K. Yu. Oblov, N. N. Samotaev, M. O. Etrekova, and A. V. Gorshkova 1508

Charged Particle Accelerators for Nuclear Technologies

Simulation of Ion Paths in the Target Material for the Injection Complex of the BELA Facility

A. V. Ziiatdinova, P. A. Fedin, A. A. Nikitin, S. V. Rogozhkin, and T. V. Kulevoy 1513

Beam Dynamics Simulation in the LINAC-100 Accelerator Driver for the DERICA Project

T. A. Lozeeva, Yu. Yu. Lozeev, S. M. Polozov, A. V. Samoshin, L. V. Grigorenko, A. S. Fomichev, W. Barth, and S. Yaramyshev 1519

Intense Beam Dynamics Study in Alvarez Accelerator

I. D. Rubtsova, L. V. Vladimirova, N. S. Edamenko, and A. B. Goncharova 1527

Beam Dynamics Simulation for the Plasma Investigation on the Experimental Facility HIPr-1

E. R. Khabibullina, R. O. Gavrilin, P. A. Fedin, R. P. Kuibeda, K. E. Pryanishnikov, A. O. Khurchiev, S. A. Vysotskiy, A. V. Kantsyrev, A. A. Golubev, and T. V. Kulevoy 1532

Physics of Gas Discharge and Plasma

The Origin of Short-Time Variations in Cosmic-Ray Intensity

I. A. Lagoyda, S. A. Voronov, and V. V. Mikhailov 1537

Solids under Extreme Conditions

Flexoelectric Effect and Shock-Induced Polarization in Polar Liquids

S. Yu. Sedov and V. A. Borisenok 1547

Investigation of the Meteorite “Chelyabinsk” by Means of the Positron Annihilation Lifetime and Transmission Mössbauer Spectroscopies

A. V. Bokov, S. V. Stepanov, V. M. Byakov, M. A. Konnychev, Y. D. Perfiliev, and S. A. Voropaev 1552

Interaction of Plasmas, Particle Beams, and Radiation with Matter

Modification of $MgAl_2O_4$ Electron-Optic Properties by Pulsed Ion Beam

A. F. Zatsepin, A. N. Kiryakov, D. A. Zatsepin, and N. V. Gavrilov 1558

Stages of the Excitation Relaxation in a Superconductor after the Impact of a Femtosecond Laser Pulse Taking into Account the Momentum Distribution of Quasiparticles

P. F. Kartsev and I. O. Kuznetsov 1565

Nonthermal Mechanism of Defect Formation in the CdHgTe Semiconductor on Exposure to Soft X-rays

R. Sh. Ramakoti, O. B. Anan'in, A. P. Melekhov, I. A. Gerasimov, G. S. Bogdanov, V. G. Sredin, I. K. Novikov, I. V. Frolova, and P. S. Dzhumaev 1571

Simulation of Nanostructures

Combination of Minimization Schemes for Improving the Efficiency of Volume Particle Size Distribution Reconstructions from Silicasol Solutions by Small-Angle X-Ray Scattering

A. E. Kryukova, P. V. Konarev, V. V. Volkov, and V. E. Asadchikov 1576
