Vol. 78, No. 12, 2015

Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Physics of Atomic Nuclei* ISSN 1063-7788.

Nuclear Fusion

Molecular Emission in the Edge Plasma of T-10 Tokamak

A. M. Zimin, V. A. Krupin, V. I. Troynov, and L. A. Klyuchnikov 1319

Theoretical and Experimental Physics of Nuclear Reactors

Concept of a Demonstrational Hybrid Reactor—a Tokamak with Molten-Salt Blanket for ^{233}U Fuel Production: 1. Concept of a Stationary Tokamak as a Neutron Source

E. A. Azizov, G. G. Gladush, V. N. Dokuka, and R. R. Khayrutdinov 1326

Separation and Application of Isotopes. Mass Spectrometry

Calculation of the Temperature in the Container Unit with a Modified Design for the Production of ^{99}Mo at the VVR-Ts Research Reactor Facility (IVV.10M)

A. A. Kazantsev, V. V. Sergeev, and O. Yu. Kochnov 1336

Technology of Nuclear Materials

Phenomenological Model of Sintering of Oxide Nuclear Fuel with Doping Admixtures

V. G. Baranov, Yu. N. Devyatko, A. V. Tenishev, and O. V. Khomyakov 1345

Physical Nature of Longevity of Light Actinides in Dynamic Failure Phenomenon

A. Ya. Uchaev, V. T. Punin, N. I. Selchenkova, E. V. Kosheleva, and V. V. Kosachev 1353

Study of the Synthesis of Nanocrystalline Mixed Tantalum–Zirconium Carbide

E. P. Simonenko, N. P. Simonenko, Yu. S. Ezhov, V. G. Sevastyanov, and N. T. Kuznetsov 1357

Synthesis of Zinc Ultrafine Powders via the Guen–Miller Flow-Levitation Method

A. N. Jigatch, I. O. Leipunskii, M. L. Kuskov, E. S. Afanasenkova, N. G. Berezkina, and S. A. Gorbatov 1366

Dislocation Model of Nucleation and Development of Slip Bands and Their Effect on Service Life of Structural Materials Subject to Cyclic Loading

D. I. Shetulov, V. V. Andreev, and A. M. Myasnikov 1374

Promising Structural Materials

Synthesis of Submicron $CaZrO_3$ in Combustion Reactions

Sh. M. Khaliullin, V. D. Zhuravlev, V. G. Bamburov, and L. V. Ermakova 1382

Synthesis of Functional Materials in Combustion Reactions

V. D. Zhuravlev, V. G. Bamburov, L. V. Ermakova, and N. I. Lobachevskaya 1389

Mathematical Simulation in Nuclear Technologies

The Use of Neural Networks for Approximation of Nuclear Data

Yu. A. Korovin and A. V. Maksimushkina 1406

Software Package for Modeling Spin–Orbit Motion in Storage Rings

D. V. Zyuzin 1415

Engineering Design of Nuclear-Physics Equipment

Hardware and Software for Ground Tests of Onboard Charged Particle Spectrometers

A. G. Batischev, A. M. Galper, S. A. Grishin, P. Yu. Naumov, and N. S. Niadvetski 1426

Gas-Discharge and Plasma Physics

Calculation of the Thermodynamic Parameters and the Degree of Ionization of Argon at Sonoluminescence

V. A. Borisenok and A. B. Medvedev 1435

Dynamics of the Microstructure of Current Channels and the Generation of High-Energy Electrons in Nanosecond Discharges in Air

V. I. Karelin, A. A. Trenkin, and I. G. Fedoseev 1440

Interaction of Plasmas, Particle Beams, and Radiation with Matter

Study of the Effect of Properties of Material on Vacuum Breakdown Initiated by Laser Radiation

V. P. Seleznev and V. O. Revazov 1446

Radiation Safety

Experimental and Theoretical Study of Organometallic Radiation-Protective Materials Adapted to Radiation Sources with a Complex Isotopic Composition

I. M. Russkikh, E. N. Seleznev, O. L. Tashlykov, and S. E. Shcheklein 1451

Medical Physics and Biophysics

Calculation and Experimental Studies of the Possibility of Online Determination of the Bragg Peak Position in Experiments on Detection of Prompt Gamma Radiation in Radiation Therapy Problems

I. I. Degtyarev, F. N. Novoskol'tsev, and G. I. Britvich 1457
