Vol. 73, No. 1, 2010
Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Physics of Atomic Nuclei* ISSN 1063-7788.

Nuclei

Experiment

On the Energy of the 3.5-eV Level in ^{229}Th
S. L. Sakharov 1

Ratios of the Real to Imaginary Part of the p^4He and pn Elastic Scattering Amplitudes at 0.7 GeV
G. A. Korolev, G. D. Alkhazov, A. V. Dobrovolsky, A. V. Khanzadeev, A. A. Lobodenko, and A. A. Vorobyov 9

Nuclear Rainbow in Elastic Scattering of ^{9}Be Nuclei
Yu. A. Glukhov, A. A. Ogloblin, K. P. Artemov†, and V. P. Rudakov† 14

Symmetric and Asymmetric Modes of ^{232}Th Photofission at Intermediate Energies
N. A. Demekhina and G. S. Karapetyan 24

Theory

Change in the Observed Half-Life of an Excited Nuclear State under Conditions of a Resonance Environment
Yu. E. Loginov 34

Implementation of the Thermonuclear Process in D^{3}He–^{9}Be Plasma on the Basis of a Z Pinch with an Ultrafast Laser Ignition
V. T. Voronchev and V. I. Kukulin 38

Consideration of the Theoretical Possibility of Regulating a Nuclear Reactor by Changing the Fraction of Delayed Neutrons
D. V. Filippov, L. I. Urutskoev, V. I. Rachkov, O. E. Gadzaova, and L. A. Lebedev 59

A Study of Electromagnetic Characteristics of ^{124,126,128,130,132,134,136}Ba Isotopes Performed in the Framework of IBA
N. Turkan 64

Investigation of Neutron and Proton Distributions of He, Li, and Be Isotopes Using the New Skyrme-Force Parameters
R. Baldık, H. Aytekin, and E. Tel 74

Symmetry Energy and the Isoscaling in Reactions on Enriched Tin Isotopes
A. S. Danagulyan, A. R. Balabekyan, and G. H. Hovhannisyan 81

Description of Spin-Dependent Observables in Elastic Proton–Deuteron Scattering on the Basis a Generalized Diffraction Model
M. N. Platonova and V. I. Kukulin 86

Comparative Analysis of the Information Content of Exclusive $(p, p'n)$ and Inclusive (p, p') Experiments with Nuclei Featuring One- and Two-Neutron Halos
V. P. Zavarzina and A. V. Stepanov 107

On the Theory of Slow-Particle Scattering in the Two-Dimensional Case
B. Ya. Balagurov 118

Elementary Particles and Fields

Experiment

Intra- and Intergroup Azimuthal Correlations of Particles in the Interaction of Gold Nuclei with Silver and Bromine Nuclei of Track Emulsions at the Projectile Energy of 10.6 GeV per Nucleon
U. U. Abdurakhmanov, K. G. Gulamov, S. I. Zhokhova, and V. Sh. Navotny 122

Theory

Unimodular Metagravity vs. General Relativity with a Scalar Field
Yu. F. Pirogov 134
Dielectron Widths of the S-, D-Vector Bottomonium States
A. M. Badalian, B. L. G. Bakker, and I. V. Danilkin 138
Study of in-Medium ω-Meson Properties in Ap and pA Collisions
Yu. T. Kiselev, S. M. Kiselev, and M. M. Chumakov 150

13th Lomonosov Conference on Particle Physics Faculty of Physics, Moscow State University August 23–29, 2007*

Elementary Particles and Fields

Experiment

Double-Beta Decay: Present Status
A. S. Barabash 162

Theory

Small-Scale Clumps in the Galactic Halo
V. S. Berezinsky, V. I. Dokuchaev, and Yu. N. Eroshenko 179
Search for New Physics at Large Hadron Collider
N. V. Krasnikov and V. A. Matveev 191
