Vol. 77, No. 1, 2014
Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Physics of Atomic Nuclei* ISSN 1063-7788.

Nuclei

Theory

Calculation of the Rate of Muon Transfer from a Proton to Neon on the Basis of the Two-Center Coulomb Basis
S. V. Romanov 1

Exchange Interaction and Elastic $^{16}O + {}^{12}C$ Scattering
S. N. Fadeev and K. A. Gridnev 13

Elementary Particles and Fields

Experiment

Interaction of 32-GeV Positrons with Photoemulsion Nuclei
V. V. Dubinina, N. P. Egorenkova, E. A. Pozharova, and V. A. Smirnitsky 17

Fragmentation of 7- to 9-GeV/c Deuterons to Cumulative Kaons
S. V. Afanasiev, L. S. Zolin, A. Yu. Isupov, V. P. Ladygin, A. G. Litvinenko, S. G. Reznikov, and A. N. Khrenov 22

Theory

The Analysis of Proton- and Deuteron-Induced-Reaction Cross Sections on Tin Isotopes at the Beam Energy of 3.65 GeV/nucleon
A. R. Balabekyan, N. A. Demekhina, V. M. Zhamkochyan, and G. S. Karapetyan 31

Proceedings of International Conference NUCLEI-2012 Fundamental Problems of Nuclear Physics, Nuclear Power Engineering, and Nuclear Technologies (LXI International Conference on Nuclear Spectroscopy and Nuclear Structure Voronezh, Russia, June 25–30, 2012)*

Nuclei

Experiment

Excitation of Isomeric States in the (γ, n), $(n, 2n)$, and $(\gamma, 2n)$ Reactions on the ^{113}In Nucleus
S. R. Palvanov 35

Theory

Energy Features of Fissile Nuclei at the Scission Point for Various Fission Modes
Yu. N. Koblik, V. P. Pikul, G. A. Abdullaeva, A. P. Morozov, and A. F. Nebesniy 39

* End of publication. For its beginning, see Phys. At. Nucl. **76**, nos. 11, 12 (2013).

Mechanisms of Formation of P-Odd, P-Even, and T-Odd Asymmetries in the Angular Distributions of Products of Binary and Ternary Fission Induced by Cold Polarized Neutrons
S. G. Kadmensky and D. E. Lubashevsky 46

Semiclassical Formula for the Alpha-Decay Rate in an Electromagnetic Field
I. V. Kopytin and A. S. Kornev 53

Brink Model with Tetrahedral Alpha-Particle Clusters for Three-Particle Forces
V. S. Kinchakov 60

Self-Consistent Approaches in the Microscopic Theory of the Nucleus: Static Moments of Odd–Odd Nuclei
S. P. Kamerdzhiev, O. I. Achakovskiy, D. A. Voitenkov, and S. V. Tolokonnikov 66

Super Neutron-Rich Nuclei: Results of Prospects of Investigations
Yu. E. Penionzhkevich 75

On the Enhancement of the Fundamental Symmetry Breaking Effects
V. E. Bunakov 85

Effect of the Shell Structure of Nuclei on p^{15}C and p^{15}N Scattering within Diffraction Theory
E. T. Ibraeva, M. A. Zhusupov, O. Imambekov, and P. M. Krassovitskiy 91

Modeling of a Microscopic Optical Pion–Nucleon Potential at Energies in the (3, 3)-Resonance Region and Nuclear-Matter Effect on the Pion–Nucleon Amplitude
V. K. Lukyanov, E. V. Zemlyanaya, K. V. Lukyanov, E. I. Zhabitskaya, and M. V. Zhabitsky 100

Elementary Particles and Fields

Experiment

Measurement of Spin Polarizabilities of the Proton
G. M. Gurevich
(A2 Collaboration) 110

Properties of Hot Nuclei Originating from Collisions of Light Relativistic Ions with Heavy Targets
V. A. Karnaukhov
(for the FASA Collaboration) 117

Theory

New Research of Charmonium over $D\bar{D}$ Threshold Using the Antiproton Beam with Momentum Ranging from 1 to 15 GeV/c
M. Yu. Barabanov, A. S. Vodopyanov, and S. L. Olsen 126
