Vol. 71, No. 2, 2008

Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Physics of Atomic Nuclei* ISSN 1063-7788.

Nuclei

Theory

- Cluster Structure of a Low-Energy Resonance in Tetraneutron
Yu. A. Lashko and G. F. Filippov 209
- Interplay of Collective and Single-Particle Properties of Excited States of Deformable Odd Nuclei ^{155}Eu and ^{161}Tm
Sh. Sharipov, M. J. Ermamatov, and J. K. Bayimbetova 215
- Self-Consistent Description of the Inner Crust of a Neutron Star within a Realistic Semimicroscopic Model
M. Baldo, E. E. Saperstein, and S. V. Tolokonnikov 221
- Rotational Properties of $N \approx Z$ Nuclei in the Presence of Neutron-Proton Correlations
A. S. Sitdikov, A. S. Nikitin, and A. A. Khamzin 244
- Preequilibrium-Decay Model with Allowance for Excitation-Energy Dissipation
O. N. Vyazankin and V. F. Denisov 255
-

Elementary Particles and Fields

Experiment

- Measurement of the Tensor (A_{yy}) and Vector (A_y) Analyzing Powers in the Fragmentation of a 9-GeV/ c Deuteron on Hydrogen and Carbon Nuclei at High Proton Transverse Momenta
L. S. Azhgirey, S. V. Afanasiev, Yu. T. Borzounov, L. B. Golovanov, V. N. Zhmyrov, L. S. Zolin, V. I. Ivanov, A. Yu. Isupov, V. I. Kolesnikov, V. P. Ladygin, A. G. Litvinenko, S. G. Reznikov, P. A. Rukoyatkin, A. Yu. Semenov, I. A. Semenova, and A. N. Khrenov 264
- Experimental Feature in the Primary-Proton Flux at Energies above 10 TeV according to the Results of Searches for Primary Particles in Nuclear Emulsions Exposed in the Stratosphere (RUNJOB Experiment)
I. S. Zayarnaya 280
-

Theory

- About Radiative Kaon Decay $K^+ \rightarrow \pi^+ \pi^0 \gamma$
V. P. Efrosinin 285
- Scalar Graviton and the Modified Black Holes
Yu. F. Pirogov 289
- Charmonium Production in Hadronic Experiments at an Energy of 70 GeV
A. K. Likhoded and A. V. Luchinsky 294

Electroproduction and Gluonic Production of J/ψ Mesons under the Assumption of Quark–Hadron Duality	309
<i>A. V. Berezhnoy and A. K. Likhoded</i>	
Sigma Meson and Phonon-like Excitations of the Instanton Vacuum	313
<i>G. M. Zinovjev, S. V. Molodtsov, T. Siemiarczuk, A. N. Sissakian, and A. S. Sorin</i>	
Chiral-Symmetry Breaking and the QCD String	321
<i>A. V. Nefediev and Yu. A. Simonov</i>	
P -Wave Hyperons in Nonperturbative Quark Dynamics	335
<i>O. N. Driga, I. M. Narodetskii, and A. I. Veselov</i>	
On the Two-Loop $\mathcal{O}(\alpha_s^2)$ Corrections to the Pole Mass of the t Quark in the MSSM	343
<i>A. V. Bednyakov, D. I. Kazakov, and A. A. Sheplyakov</i>	
Dual Analytic Model of Generalized Parton Distributions	351
<i>L. L. Jenkovszky</i>	
Toward the Understanding of Quark Matter Formation	364
<i>B. O. Kerbikov and E. V. Luschevskaya</i>	
$K^0 \rightarrow \bar{K}^0$ and $B^0 \rightarrow \bar{B}^0$ Transitions in the Minimal Supersymmetric Standard Model Involving an Explicit CP Violation in the Higgs Sector	374
<i>M. N. Dubinin and A. I. Sukachev</i>	
Method of “Optimum Observables” and Implementation of Neural Networks in Physics Investigations	388
<i>E. E. Boos, V. E. Bunichev, L. V. Dudko, and A. A. Markina</i>	
<hr/> Future Publications <hr/>	394
