Nuclei

Experiment

Effect of Beta-Electron Capture to a Bound State
on Delayed-Neutron Emission from Fission Fragments

Yu. P. Gangrsky, F. F. Karpeshin, M. B. Trzhaskovskaya, and Yu. E. Penionzhkevich 951

Investigation of the $^{208}\text{Pb}(^{18}\text{O}, f)$ Fission Reaction: Mass–Energy Distributions of Fission
Fragments and Their Correlation with the Gamma-Ray Multiplicity

*A. Ya. Rusanov, M. G. Itkis, N. A. Kondratiev, V. V. Pashkevich, I. V. Pokrovsky,
V. S. Salamatin, and G. G. Chubarian* 956

Theory

Semiphenomenological Approximation of the Sums of Experimental Radiative Strength
Functions for Dipole Gamma Transitions of Energy E_γ below the Neutron Binding Energy
 B_n for Mass Numbers in the Range $40 \leq A \leq 200$

A. M. Sukhovej, W. I. Furman, and V. A. Khitrov 982

Nuclear Asymptotic Normalization Coefficients for $^{14}\text{N} \rightarrow ^{13}\text{C} + p$ Configurations and Astrophysical
 S Factor for Radiative Proton Capture

S. V. Artemov, A. G. Bajajin, S. B. Igamov, G. K. Nie, and R. Yarmukhamedov 998

Nuclear Scissors Mode with Pairing

E. B. Balbutsev, L. A. Malov, P. Schuck, M. Urban, and X. Viñas 1012

Elementary Particles and Fields

Experiment

Investigation of Background Sources Associated with the Production of Radioactive Isotopes
in the DEVIS Experiment (Double-Beta Decay)

V. A. Belov, O. Ya. Zeldovich, and A. S. Kobayakin 1031

Theory

On the Role of FSI in $K \rightarrow 2\pi$ Decay

E. P. Shabalin 1036

Direct Calculation of the Probability of Pionium Ionization in the Target

M. V. Zhabitsky 1040

Dipion Decays of Heavy Quarkonium in the Field Correlator Method

Yu. A. Simonov 1048

The Approximation Method for Calculation of the Exponents of the Gluon Distribution, λ_g ,
and the Structure Function, λ_S , at Low x

G. R. Boroun and B. Rezaie 1077

**Proceedings of the XII International Conference
on Symmetry Methods in Physics
July 3–8 (2006), Yerevan, Armenia***

Four-Dimensional Double-Singular Oscillator

M. Petrosyan

1094

Cubic Extensions of the Poincaré Algebra

M. Rausch de Traubenberg

1102

The Goldstone Fields of Interacting Higher Spin Field Theory in AdS(4)

W. Rühl

1109

Dirac–Yang Monopoles in all Dimensions and Their Regular Counterparts

T. Tchrakian

1116
