Contents

Vol. 12, No. 2, 2019

Exact Algorithms of Search for a Cluster of the Largest Size in Two Integer 2-Clustering Problems
A. V. Kel'manov, A. V. Panasenko, and V. I. Khandeev 105

Automated System for Identification of Conditions for Homogeneous and Heterogeneous Reactions in Multiobjective Optimization Problems
K. F. Koledina, S. N. Koledin, and I. M. Gubaydullin 116

A Method for Obtaining Analytical Solutions to Boundary Value Problems by Defining Additional Boundary Conditions and Additional Sought-For Functions
I. V. Kudinov, E. V. Kotova, and V. A. Kudinov 126

Two-Grid Methods for a New Mixed Finite Element Approximation of Semilinear Parabolic Integro-Differential Equations
C. Liu and T. Hou 137

Randomized Monte Carlo Algorithms for Problems with Random Parameters ("Double Randomization" Method)
G. A. Mikhailov 155

An Adaptive Analog of Nesterov's Method for Variational Inequalities with a Strongly Monotone Operator
F. S. Stonyakin 166

Parameter-Uniform Numerical Methods for a Class of Parameterized Singular Perturbation Problems
D. Shakti and J. Mohapatra 176

Sensitivity of Functionals to Observation Data in a Variational Assimilation Problem for a Sea Thermodynamics Model
V. P. Shutyaev and E. I. Parmuzin 191
