Contents

Vol. 12, No. 3, 2019

A Modification of Numerical Methods for Stochastic Differential Equations with First Integrals
T. A. Averina and K. A. Rybakov 203

Simulation of Body Motion in Viscous Incompressible Fluid
A. S. Kozelkov, V. R. Efremov, A. A. Kurkin, N. V. Tarasova, D. A. Utkin, and E. S. Tyatyushkina 219

Exact Solutions to Shallow Water Equations for a Water Oscillation Problem in an Idealized Basin and Their Use in Verifying Some Numerical Algorithms
N. A. Matskevich and L. B. Chubarov 234

Numerical Methods for a Nonlocal Parabolic Problem with Nonlinearity of Kirchhoff Type
M. Mbehou and G. Chendjou 251

Controllability of a New Nonparametric Statistical Criterion Alternative to the Wilcoxon–Mann–Whitney Test
G. I. Salov 263

Mathematical Modeling of a Positive Connection in the p53–microRNA Tumor Marker System
S. D. Senotrusova and O. F. Voropaeva 270

Asymptotic Analysis of the Crack Tip Stress Field (Consideration of Higher Order Terms)
L. V. Stepanova 284

Variational Interpolation of Functionals in Transport Theory Inverse Problems
V. V. Uchaikin and V. A. Litvinov 297
