Optical Information Technologies

Mathematical Tool for Calculating the Microstructure of a Harmonic Kinoform Lens <i>A. I. Antonov, G. I. Greisukh, E. G. Ezhov, and E. A. Ryzhova</i>	1
Ellipsometric Method of Substrate Temperature Measurement in Low-Temperature Processes of Epitaxy of InSb Layers <i>V. A. Shvets, I. A. Azarov, S. V. Rykhlitskii, and A. I. Toropov</i>	8
Optical Hilbert Diagnostics of Hydrogen Jet Burning <i>Yu. N. Dubnishchev, V. A. Arbuzov, V. V. Lukashov, K. A. Sharov, and V. V. Lemanov</i>	16
Investigation of Characteristics of Thick Diffraction Gratings by the Method of Laser Heterodyne Tomography <i>P. E. Tverdokhleby, Yu. A. Shchepetkin, and I. Sh. Steinberg</i>	20
Effect of Photo-response Nonlinearity on the Diffraction Efficiency of Holograms <i>S. A. Shoydin</i>	28
Calculation of Light Scattering on a Bragg Grating by Recursion of Transfer Matrices on a Nonuniform Grid <i>N. I. Gorbenko, V. P. Il'in, and L. L. Frumin</i>	32
Polarization Conversion by Transformation of the TM_0 - TE_1 Modes in an Ion-Exchange Glass Waveguide <i>M. M. Vekshin and N. A. Yakovenko</i>	41

Analysis and Synthesis of Signals and Images

Terahertz Imager Based on a THz-to-IR Converter <i>A. G. Paulish, B. N. Novgorodov, S. V. Khryashchev, and S. A. Kuznetsov</i>	45
Algorithms of Interpolation of Quadrature Signals for High-Resolution Encoders of Linear and Angular Displacements <i>A. V. Kiryanov, V. P. Kiryanov, and V. V. Chukanov</i>	52
Detection of Moving Objects by a Passive Scanning System <i>V. K. Klochko</i>	59
Nonlinear Estimation of Signal Parameters under the Influence of Narrowband Non-Gaussian Noise <i>V. M. Artyushenko and V. I. Volovach</i>	66
Integral Operator for Boundary Contrasting of Two-Dimensional Images Formed by an Optic-Electronic Device <i>A. N. Katulev and A. A. Khramichev</i>	74

Identification of Dynamic Objects using a Family of Experimental Supporting
Integral Curves

Yu. G. Bulychev, A. G. Kondrashov, and P. Yu. Radu

81

Automation Systems in Scientific Research and Industry

Modern Ground-Based Solar Telescopes and Requirements for Their Automation Systems

A. A. Lubkov and Yu. A. Popov
