## Optical Information Technologies

Selection of Basic Parameters of Adaptive Optical Systems <i>V. P. Lukin</i>	111
Computer Simulation of Adaptive Optics for Laser Systems in Atmospheric Applications <i>P. A. Konyaev</i>	119
Thin Dynamic Holograms with an Asymmetric Fringe Profile <i>V. Yu. Venediktov</i>	126
Phase Correction of Laser Radiation with the Use of Adaptive Optical Systems at the Russian Federal Nuclear Center—Institute of Experimental Physics <i>S. G. Garanin, A. N. Manachinsky, F. A. Starikov, and S. V. Khokhlov</i>	134
Analysis of Static Errors of Adaptive Mirrors <i>A. V. Chernykh, O. I. Shanin, and V. I. Shchipalkin</i>	141
Using Photodetectors in Shack–Hartmann Wavefront Sensors <i>L. V. Antoshkin, V. V. Lavrinov, L. N. Lavrinova, and V. P. Lukin</i>	146
Wavefront Compensation Method Using a Shack–Hartmann Sensor as an Adaptive Optical Element System <i>A. V. Kudryashov, V. V. Samarkin, Yu. V. Sheldakova, and A. G. Aleksandrov</i>	153
Principles of Designing Adaptive Relay Systems for Stratospheric Power Transmission <i>V. I. Kishko and V. F. Matyukhin</i>	159
Tests of an Adaptive Optical System on a Model Atmospheric Turbulent Path <i>S. V. Pikulev, V. V. Semenov, A. V. Chernykh, O. I. Shanin, and V. I. Shchipalkin</i>	166
Adaptive Focusing of Coherent Radiation with the Use of a Fluctuating Illuminating Signal as a Reference Source <i>L. A. Bol’basova and V. P. Lukin</i>	174
Modified Hartmann Method for Measuring Wide-Aperture Adaptive Mirrors <i>D. M. Lyakhov, O. I. Shanin, and V. I. Shchipalkin</i>	182
Advanced Adaptive Correction of Turbulent Distortions Based on a Shack–Hartmann Wavefront Sensor Measurements <i>L. B. Antoshkin, V. V. Lavrinov, and L. N. Lavrinova</i>	188
Usage of Wavefront Sensor for Estimation of Atmospheric Turbulence Parameters <i>M. S. Andreeva, N. G. Iroshnikov, A. B. Koryabin, A. V. Larichev, and V. I. Shmalgauzen</i>	197
Generation of Control Signals for Adaptive Systems Using Laser Atmospheric Backscatter <i>Ya. I. Malashko and V. M. Khabibulin</i>	205
Spectrophotometric Method for Measuring the Groove Depth of Calibration Reflection Gratings <i>V. P. Korol’kov and S. A. Konchenko</i>	211
