Vol. 54, No. 2, 2018

A simultaneous English language translation of this journal is available from Allerton Press, Inc.,
Distributed worldwide by Springer. *Optoelectronics, Instrumentation and Data Processing* ISSN 8756-6990.

Optical Information Technologies

- Laser Technologies in Micro-Optics. Part 2. Fabrication of Elements with a Three-Dimensional Profile
A. G. Poleshchuk, V. P. Korolkov, V. P. Veiko, R. A. Zakoldaev, and M. M. Sergee 113
- Formation of Thick High-Aspect-Ratio Resistive Masks by the Contact Photolithography Method
A. N. Gentshev, F. N. Dul'tsev, V. I. Kondrat'ev, and A. G. Lemzyakov 127
- Detection of High-Order Reflexes on Volume Reflection Holographic Gratings
E. F. Pen 135
- Device for Characterization of the Diffraction Pattern of Computer-Generated Holograms in a Wide Angular Range
D. A. Belousov, A. G. Poleshchuk, and V. N. Khomutov 139
-

Analysis and Synthesis of Signals and Images

- Algorithms for Estimating Signal Information Parameters under the Action of Broadband Non-Gaussian Noise
V. M. Artyushenko and V. I. Volovach 146
- Nonlinear Filter Model for Digital Imaging of Contrast Images
V. A. Surin and A. N. Tyrsin 155
- Experimental Testing of the Variational Procedure for Constructing Multidimensional Radio Images of Echo Signals in Non-Emitting Radars
I. V. Donets, Ya. A. Reizenkind, and V. N. Shevchenko 162
-

Physical and Engineering Fundamentals of Microelectronics and Optoelectronics

- Spectroscopy of Single AlInAs Quantum Dots
I. A. Derebezov, A. V. Gaisler, V. A. Gaisler, D. V. Dmitriev, A. I. Toropov, A. S. Kozhukhov, D. V. Shcheglov, A. V. Latyshev, and A. L. Aseev 168
- Experimental Investigation of a Piezo-Optical Transducer for Highly Sensitive Strain Gauges
A. G. Paulish, P. S. Zagubisalo, V. N. Barakov, and M. A. Pavlov 175
- Influence of a Low-Temperature GaAs Dislocation Filter on the Perfection of GaAs/Si Layers
D. S. Abramkin, M. O. Petrushkov, E. A. Emel'yanov, M. A. Putyato, B. R. Semiyagin, A. V. Vasev, M. Yu. Esin, I. D. Loshkarev, A. K. Gutakovskii, V. V. Preobrazhenskii, and T. S. Shamirzaev 181
- State-of-the-art Architectures and Technologies of High-Efficiency Solar Cells Based on III-V Heterostructures for Space and Terrestrial Applications
N. A. Pakhanov, V. M. Andreev, M. Z. Shvarts, and O. P. Pchelyakov 187
-

Computational and Data Acquisition Systems

Amplification Channel for Avalanche Photodiode Signals Purposed for Spectrometric Measurements under High Peak Rates

Yu. V. Yudin, D. N. Grigor'ev, and L. B. Epshtein

203

Role of the ATLAS Grid Information System (AGIS) in Distributed Data Analysis and Simulation

A. V. Anisenkov

208
